

CuLor™

Introducing **CuLor™** drawer pulls made with **CuVerro®** bactericidal copper surfaces

**Kills more than 99.9% of bacteria* within 2 hours,
and continues to kill 99% of bacteria*
even after repeated contamination.**

CuVerro® is EPA-Registered

CuVerro®
Bactericidal Copper Surfaces

CuVerro® is a registered trademark of GBC Metals, LLC and is used with permission (EB-0002-1310)

* Laboratory testing shows that, when cleaned regularly, CuVerro surfaces kill greater than 99.9% of the following bacteria within 2 hours of exposure: Methicillin-Resistant Staphylococcus aureus, Staphylococcus aureus, Enterobacter aerogenes, Pseudomonas aeruginosa, E. coli O157:H7 and, Vancomycin-Resistant Enterococcus faecalis (VRE).

The use of CuVerro® antimicrobial copper products is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination. It should not be interpreted that CuVerro is making claims to solely prevent bacterial infections nor should it be implied that CuVerro products make such claims.
