Drawer box specifications

NOTE: Drawer side material thickness may vary. Accurate measurement of drawer side material thickness should be used when calculating outside drawer width using the table below. Inside drawer width **must** equal opening width minus 49 (1-15/16") for TANDEM to align and function optimally.

Calculating outside drawer width

For drawer side thickness	19 (3/4")	18 (23/32")	17 (21/32")	16 (5/8")	15 (19/32")
Deduct from opening width	11 (7/16")	13 (1/2")	15 (19/32")	17 (21/32")	19 (3/4")

Example: For 21" opening width and a 3/4" thick drawer, 21" minus 7/16" = 20-9/16" drawer width

Drawer box specifications

Front view

NOTE: Drawer side material thickness may vary. Accurate measurement of drawer side material thickness should be used when calculating outside drawer width using the table below. Inside drawer width must equal opening width minus 42 (1-21/32") for TANDEM to align and function optimally.

Calculating outside drawer width

For drawer side thickness	16 (5/8")	15 (19/32")	14 (9/16")	13 (1/2")	12 (15/32")
Deduct from inside cabinet width	10 (13/32")	12 (15/32")	14 (9/16")	16 (5/8")	18 (23/32")

Example: For 21" inside cabinet width and a 5/8" thick drawer, 21" minus 13/32" = 20 - 19/32" drawer width

SERVO-DRIVE

SERVO-DRIVE is an electrical opening assist for TANDEM, TANDEMBOX and LEGRABOX. Drawers open automatically with just a touch of the drawer front or with a light pull of the handle. This unique feature is based on an electrical drive unit that, once activated, opens the drawer for you.

Existing cabinets can be easily retrofitted with SERVODRIVE. No modifications to the drawer system are necessary when upgrading.

With SERVODRIVE, the drawer is not connected to the drive unit. This enables the drawer to be stopped at any position, providing you full control.
