The **Scepter DOCK-1600** offers portable power and charging for common areas. The sleek triangular tower design allows the unit to fit seamlessly in any location. Tamper-resistant AC outlets, USB Type-A charging port(s), USB Type-C charging port(s), and Qi wireless rapid charging pockets are easily accessible from all directions.

Features

- Steel base with aluminum body
- 4 Heights to choose
 - Scepter S: 19.75" (500 mm) Height
 - Scepter M: 31.5" (800 mm) Height
 - Scepter L: 39.5" (1000 mm) Height
 - Scepter T: 47.25" (1200 mm) Height
- Available configurations
 - Up to 6 Tamper-Resistant AC outlets (10A)
 - Maximum of 3 USB Type-A charging modules (1 x 2.4A and 1 x 2.1A ports per module)
 - 60W USB Type-C charging ports (Power Delivery & Quick Charge enabled, supporting 20V output for laptops)
 - Up to 3 Qi wireless rapid chargers
- Comes with slot for Kensington NanoSaver™ security locks
- Wireless charging pockets with automatic alignment control
- Standard Colors: White, Silver, and Black
- Custom finishes optional
- Optional accessories allow for permanent mounting or casters for easy relocation
- 125V 12A rating

Power without the power cord. Easily bring 5V power to portable locations to charge your phone, tablet, or other electronics. The Revive has a 5V 20000 mA rechargeable battery pack that can completely charge most smart phones from 0 to 100% up to 5 times. It has a USB port and proprietary connector that makes it compatible with our DOCK-150,DOCK-900, and DOCK-950 wireless chargers. Simply install the Revive under a table or anywhere you desire to have remote power. The battery pack is securely housed inside the PPD power tray. When the battery level is low, the battery pack can be easily removed for recharging. Security feature helps to prevent against accidental release of the battery and/or theft.

Features

- Durable power tray to protect battery pack
- 5V 20000 mA Li-ion battery pack can charge most smart phones completely up to 5 times
- DC 5V USB output ports (USB Type A & C) for various applications
- Proprietary corded output for direct connection to National Lighting's Qi Wireless chargers
- USB Type-C input for quick battery pack recharge
- LED indicator to show battery power levels
- Included wall adapter to recharge battery pack

(Power Tray)

Our new DOCK-010 and DOCK-011 are compact versions of our Dock-200 series. Small, yet mighty they can be installed in offices, lounges, and other areas where power for mobile devices are needed. They offer discreet power for many applications.

DOCK-010

Features

- 1 grounded TR AC outlet
- 125V, 15A rating
- 1 5/8" bore for installation

Specifications

DOCK-011

Features

- 1 USB Type-A charging module (1 x 2.4A and 1 x 2.1A ports per module)
- 1 5/8" bore for installation

Specifications

Our new Rejuvenate is a stylish table top power station. Due to its design, power and charging can be accessed from both sides of the dock. When equipped with optional Qi wireless rapid charging, the Rejuvenate cradles to hold phones up right and accessible when charging. The docks are also available with Type-A and/or Type-C USB chargers that are compatible with most portable devices. The dock's mesh covered power cord can exit the side of the unit or can exit underneath the unit. Optional mounting kit can be installed under the table for permanent installation.

Features

- Available configurations
 - Up to 4 Tamper-Resistant AC outlets (10A)
 - Maximum of 4 USB Type-A charging modules (1 x 2.4A and 1 x 2.1A ports per module)
 - Up to two 60W/30W USB Type-C charging ports (Power Delivery & Quick Charge enabled, supporting 20V output for laptops)
 - Optional Qi wireless rapid chargers
- Aluminum Body
- 10' mesh covered 14 AWG x 3C power cord
- Standard Colors: White, Silver, and Black
- Custom finishes optional
- Optional mounting bracket for secure installation
- 125V 12A rating

National Lighting will be offering daisy-chain options on many of our power and charging docks and strips. We will be offering both hard-wire and plug & play options on many of these items. Look for our new daisy-chain icon throughout this catalog.

Features

- Hard-wired and plug & play versions available
- Optional OCP (over current protection) hub
- Locking connectors for solid connections

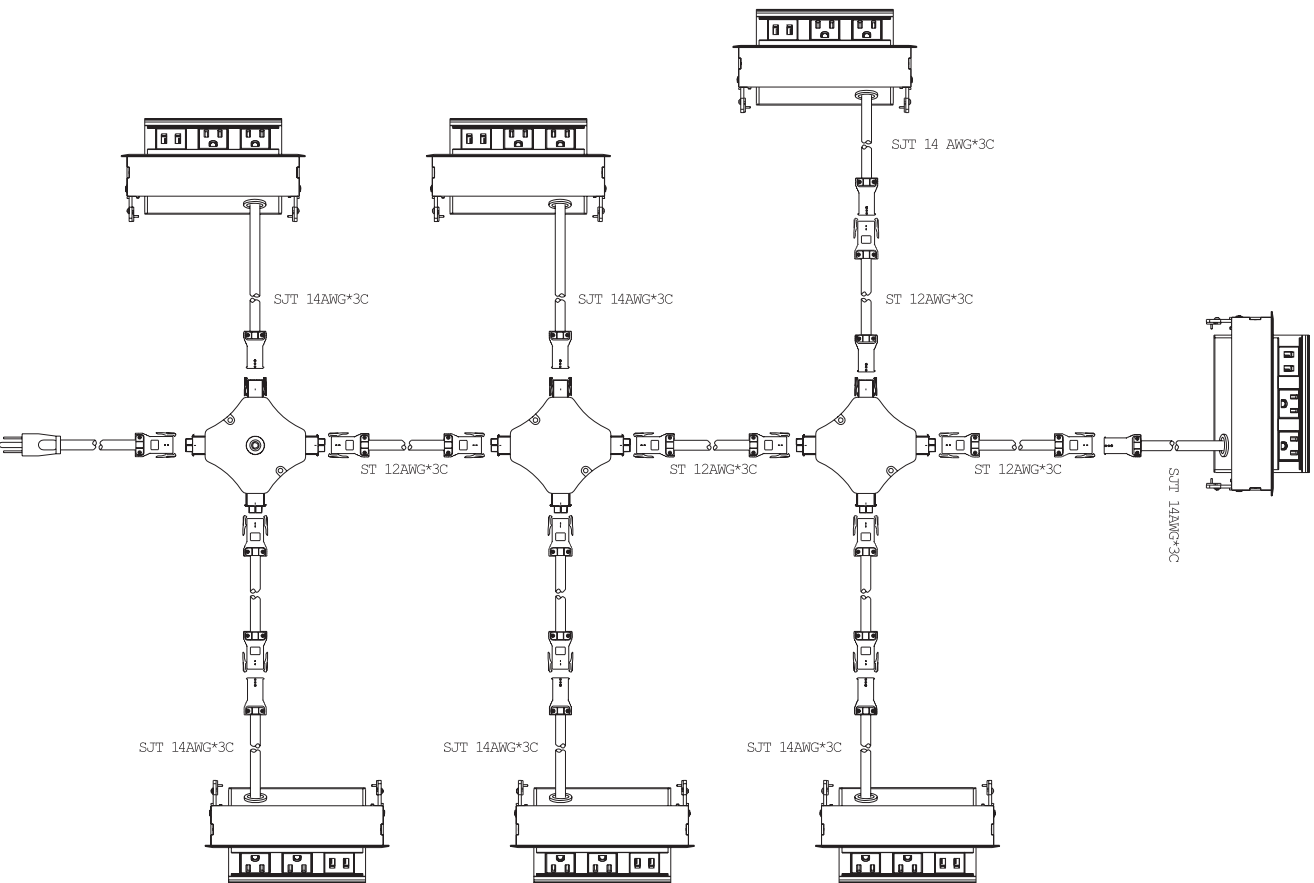

Daisy-Chain

Product that can be Daisy-Chained will show this icon

Example

Daisy-Chain shown with Dock-700 Series

Tamper-Resistant Receptacle Option

Tamper-Resistant (TR) receptacles have been required by the NEC (National Electrical Code) in new and renovated homes since 2008. The 2017 edition of the NEC further requires TR receptacles to be installed in other property types where children are likely to be present. Such properties include offices, hotel/motel guest rooms, corridors, waiting rooms, medical & dental offices, outpatient facilities, childcare facilities, preschool & elementary educational facilities, etc.

Quick Facts

A study found that 100% of 2-4 year olds in an experimental group were able to remove one type of plastic outlet cap within 10 seconds. An analysis of U.S. Consumer Product Safety Commission (CPSC) data revealed that over 2,400 children under the age of 10 years old were treated in emergency rooms as the result of receptacle-related incidents each year. That's an average of almost 7 children a day!

National Lighting's TR receptacle has a built-in shutter system that prevents foreign objects from being inserted into the contact openings. This shutter system only allows a standard attachment plug to be inserted to the receptacle when even insertion force is applied. Most of National Lighting's power products offer a tamper-resistant receptacle option. Please check with us for availability.

Spiral Power Cord Option

Our electrical wiring systems can be customized with a spiral power cord, eliminating excess cordage when full length is not needed for certain applications such as height adjustable workstations. There is a minium order quantity for adding the spiral power cord. Please consult your sales representative for more information.

The **DOCK-100 Series** offers powerful and discreet USB charging options to meet your power charging needs. The series can have single or dual USB charging port configurations as well as multiple mounting options to help fit your furniture, space, and power needs!

Compact USB Charging Hubs

USB Charger DOCK-110

The DOCK-110 USB charger features an internal blue LED power indicator to make the USB charger easy to locate in dark environments. The included mounting bracket gives the DOCK-110 multiple mounting options.

DOCK-110-XC-SMB

- 5V DC 2.1A (10.5 watts) USB charging port (external power adapter required)
- Pair with 5V DC 2.1A wall-plug power adapter and 8' leads
- 8' USB Type-A input cord included
- Linkable with other DOCK-100 Series products when using optional hub
- Blue LED back lighting
- Cut a 0.807" x 0.610" hole for installation

3" Grommet Power Dock with 125V AC outlet and 5V DC 4.2A USB charger

The 3” Grommet Power Dock can be used in any application where easy access to AC power and USB charging (up to DC 5V 4.2A) is desired. Simply bore a 3” hole for installation or replace an existing 3” grommet with the DOCK-200 of your choice. The innovative threaded housing and retaining nut installation system allows for simple, quick, and reliable installation. With a single touch of a fingertip, the spring-loaded lid of the DOCK-200 gently opens to reveal power receptacles.

Specifications

- 3” Dock with or without flip lid
- 1 or 2 grounded AC Outlets, 125V 15A rating
- DC 5V 4.2A USB Charger (2.1A is also available on a special order basis)
- 10ft 14AWG x 3C power cord, 15A rating
- 1000 joules surge protection available as an option

The DOCK-261-GB and DOCK-271-GB are our latest addition to the Dock-200 series. They offer a grounded universal AC outlet with a 240V and 13A rating.

DOCK-261-GB

Features

- 3" Dia. Dock with square faceplate
- 1 grounded universal AC outlet
- 240V, 13A rating
- 10ft power cord
- 2 USB charging ports w/1A (5 watts) charging power on each port

Specifications

DOCK-271-GB

Features

- 3" Dia. Dock with square faceplate
- 1 grounded universal AC outlet
- 240V, 13A rating
- 10ft power cord
- 2 USB charging ports w/2.1A (10.5 watts) charging power on each port

Specifications

Replace a 3" Grommet with a Power Station

The TV2802-PU-2.1A pull up power harness can be used in any application where easy access to AC power and USB charging (up to DC 5V 4.2A) is desired. Simply bore a 3" hole for installation or replace a 3" grommet with the TV2802-PU-2.1A. The innovative threaded housing & retaining nut installation system allows for simple, quick and reliable installations. Pull up the unit by its easy-to-use handle to reveal power receptacles and charging ports.

Specifications

- Bore 3" hole for installation
- 2 AC receptacles, AC 125V 15A Max.
- 2 DC 5V USB charging ports provide shared 4.2A (21 watts) (TV2802-PU-4.2A) or 2.1A (10.5 watts) (TV2802-PU-2.1A) charging power
- 6ft (Min.), 14 AWG power cord
- Requires minimum of 12" clearance under mouting surface to operate correctly
- Suitable for installation in a kitchen or bathroom counter top surface when plugged into a GFCI receptacle or GFCI branch circuit
- UL & cUL certified for use in USA & Canada

Replace a 3” Grommet with a Power/Ethernet Station

The TV2202-PU pull up power harness provides you an economic solution to easy-access AC receptacles and a Cat.6 Ethernet coupler. Pull the harness up when you need it and store it under your desktop when you don’t. Each of the AC receptacles are facing in a different direction which minimizes the issue caused by oversized power plugs.

Specifications

- Bore 3” hole for installation
- 2 AC receptacles, AC 125V 15A Max.
- Cat.6 rated RJ45 Eternet coupler
- 6ft (Min.), 14 AWG power cord
- Requires minimum of 12” clearance under mouting surface to operate correctly
- Suitable for installation in a kitchen or bathroom counter top surface when plugged into a GFCI receptacle or GFCI branch circuit
- UL & cUL certified for use in USA & Canada

Replace a 3” Grommet Pull-Up Power Dock

The TV3001-PU pull up power harness provides you an economical solution for easy access to AC receptacles. Pull the harness up when you need it and store it under your desktop when you don’t. The AC receptacles are rotated in different directions to minimize issues caused by oversized power plugs. Simply place your 3” grommet with a TV3001-PU to help organize your work surface.

Specifications

- Bore 3” hole for installation
- 3 AC receptacles, AC 125V 15A Max.
- 6ft (Min.), 14 AWG power cord
- Requires minimum of 12” clearance under mouting surface to operate correctly
- Suitable for installation in a kitchen or bathroom counter top surface when plugged into a GFCI receptacle or GFCI branch circuit
- UL & cUL certified for use in USA & Canada

Eliminate the need for space wasting power adapters by using our DOCK-650 power & data station. The DOCK-650 provides AC power, USB charging, and multiple data transmission options in a convenient package.

Features

- 2 120V AC outlets, 12A Max. rating
- 2 USB 5V 1.05A (5.25 watts) charging ports for charging smart phones, tablets, etc. (4.5A available as an option)
- 2 USB 2.0 data transmission ports for data communication
- 1 HDMI Coupler
- 1 RJ45 Eternet coupler
- 1 RJ11 phone coupler
- 10ft 14 AWG x 3C power cord
- Cut 7.95" x 4.06" hole for installation
- UL & cUL certified for use in USA & Canada

Closed View

A better solution for meeting your power & communication needs

The **DOCK-700** series offers flexible configurations to meet your needs. Open smoothly by simply pressing down on the lid revealing convenient power and/or communication couplers; closes easily to be hidden from view when not in use.

The **DOCK-700** series has a customizable modular design that allows the choice of 125V AC power outlets, USB Type-A/C charging ports, PoE compatible Ethernet couplers, phone couplers, HDMI couplers, and VGA couplers.

The **USB Type-C charger** is ideal for charging newer phones, tablets, and even laptops utilizing the newest rapid charge standards. These new standards include USB Power Delivery, Battery Charging, Quick Charge, and 5V 2.4A rapid charge up to 60 watts.

Surge Protection (rated at 1,000 Joules) can be included on docks with three or more AC outlets to help protect connected equipment against damage caused by power surges and/or lightning.

- Instructions:**
1. Cut a hole on desktop surface. Hole dimensions differ, please verify dock dimensions before cutting
 2. Insert the Dock (1) into the hole (2) on the desktop surface
 3. Slide the retaining brackets (3) over the thumb screws (4)
 4. Tighten the screws by turning by hand or with a hex wrench
 5. Repeat steps 2 and 3 for all four screws and retaining brackets
 6. Plug power cord to the nearest wall outlet, making sure the wall outlet is properly grounded

The ultimate power & data hub for conference room applications

The **DOCK-800** is designed for conference rooms and other applications that can benefit from the addition of convenient power receptacles, data communication, and media options in a modern, easy to use solution. Its standard finishes are anodized aluminum or black anodized with other custom finishes available upon request.

Each side of the DOCK-800 features three AC receptacles coupled with two 2.1A (10.5 watts) USB charging ports and a wire management grommet. The well of the DOCK-800 houses four knock-outs that allow for easy installation of PoE enabled CAT.6 Ethernet couplers, phone couplers, HDMI couplers, USB 3.1 couplers and one VGA coupler. The covers on the DOCK-800 open manually and close smoothly with a simple touch.

DOCK8S6-211110-XX-152-BK

Features

- Stylish aluminum housing with beveled edges
- Three 125V AC receptacles, two 2.1A (10.5 watts) USB charging ports and one wire management grommet on each side of the DOCK-800 (Optional USB Type-C chargers)
- 10' 14AWG x 3C SJT power cord, 15A rating
- Available data and media couplers: CAT.6 Ethernet, RJ11 phone, USB, HDMI, and VGA
- Standard finish options: Anodized Aluminum & Black Anodized
- Custom finishes & configurations available upon request
- UL & cUL certified for use in USA & Canada

The **DOCK-150 wireless & USB combo charging dock** offers wireless and USB charging in a simple elegant package. The pop-up USB ports can be hidden when they are not in use to keep your work surface clean and organized. Three convenient USB type-A ports offer a total of 4.4A (22 watts) of charging power for mobile devices that do not support wireless charging.

Wireless + USB

- Features
- Qi certified and FCC ID registered
 - Finish Options: Black or White
 - Wireless charging distance: ¼" (6.36 mm) Max.
 - Input:
 - DC 5V, 6A
 - Output:
 - Wireless charger: 5 watts Max.
 - USB charging ports:
 - 1 x 2.4A (12 watts) Max.
 - 2 x 1A (5 watts) Max.

The **DOCK-900** wireless charger is Qi certified and FCC ID registered which helps to ensure a reliable and efficient wireless charging experience. It is designed both to be installed securely under a surface with the supplied mounting bracket or simply placed on top of a surface. Its multi-coil design provides a wider charging area for easier device alignment.

- Features
- Qi certified & FCC ID registered
 - Charges through surface up to ⅛" (3.18 mm)
 - Charging distance: ¼" (6.36 mm) Max.
 - Input options:
 - DC 5V, 2A (w/included AC power adapter)
 - DC 9V, 1.67A (w/optional Quick Charge power adapter)
 - DC 12V, 1A (optional)
 - Output:
 - 5 watts Max. w/DC 5V, 2A power adapter
 - 10 watts Max. with QC power adapter

Wireless Charging Docks

DOCK-950 Series

The **DOCK-950** is powered by the latest Qi compliant IC offering reliable and efficient wireless charging in a convenient 3” grommet hub. Simply place your mobile device on the DOCK-950 and then a LED will confirm pairing and begin wireless charging.

Features

- Qi certified and FCC ID registered
- Finish Options: Black or White
- Charging distance: ¼" (6.36 mm) Max.
- Input options:
 - DC 5V, 2A (with standard AC power adapter)
 - DC 9V, 1.67A (with optional Quick Charge power adapter)
- Output options:
 - 5 watts Max. with DC 5V, 2A power adapter
 - 10 watts Max. with QC power adapter

Clamp-On Power Docks

DOCK-1000 Series

A sleek solution for all your desktop power needs. The DOCK-1000 can provide AC receptacles, USB charging ports (Type-A & C) and data communication ports conveniently on or under your work surface. The number of modules can be customized by National Lighting to fit your task needs. Mounting options include table top angled, table top vertical and under table mounting brackets.

USB – Indicates 00-20 USB Modules (2 ports per module), maximum of 10 USB modules per strip.
Receptacle Orientation
1- Receptacles in line with the harness
2- Receptacles turned 90 degrees

Optional Smart Charging Function

Smart Charging can be special ordered as an added feature to any of our Heavy Duty Power & USB Charging Strips. The smart charging function reduces peak amperage draw when several devices are plugged into the power strip which can help to lower electric bills. With the smart charging feature, outlets on the power strips are broken down into small groups of outlets that the power strip periodically runs load tests. This determines which group needs to be charged first, and then continues to the next group. Once all

devices are fully charged, the smart charging feature will shut off power to the outlets but check them periodically to ensure all devices plugged in maintain their charge. If the testing reveals a group or device needs more charging it will power back on and charge as needed. Smart Charging is recommended for applications where multiple devices will be left charging. It is not recommended for applications where constant power is needed.

HH6S1-100001-CX-153-SF-BA

WORKING TODAY
FOR A BETTER TOMORROW

The **LEDTL-5 Series Task Light** eliminates all the common problems associated with fluorescent lighting so now you can do your work without an annoying buzz in your ears or an undependable flickering lamp. The LEDTL-5 Series offers significant energy savings compared to traditional T8 fluorescents fixtures. They are environmentally friendly, so there is no need to worry about disposing toxic lamps.

CREATE THE AMBIENCE
YOUR CLIENT DESERVES

The **LEDR Series** is a precision accent lighting system with flexible application abilities that enhance architectural design. Our LEDs are engineered for easier use in different types of applications. The LEDR Ribbon offers user friendly connectors for simple installation eliminating the need for field-soldering. It lasts an average of 50,000 hours compared to a typical incandescent that might only last 2,000 hours, thus, reducing maintenance costs. When high output LEDs are used, they can reduce energy consumption up to 90% when compared to incandescent linear lighting. Our LED ribbon is available in a wide range of color temperatures so designers have various choices—from residential friendly warm white to high-tech, attention-grabbing cool white—it is available in Green, Yellow, and multiple RGB colors. They are also available with different insulating materials for applications where a water resistant fixture is needed.

- Features**
- 8mm (5/16") wide ribbon contains 60 LEDs per meter (18 LEDs per ft)
 - Maximum continuous run 10 meters (32.8ft)
 - Highly flexible circuit board with 3M™ adhesive tape that can be applied to most accessible surfaces
 - Durable LEDs with an expected lifespan of 50,000 hours
 - Powered by DC 12V power supply, low voltage, and low heat
 - No UV, no mercury, and RoHS compliant
 - Standard package: 16.4ft/roll
 - Requires transformer LEDTF-2A or dimmable LED driver
 - 3 Year Warranty
 - UL &cUL certified for use in USA & Canada

High Output Flexible LED Tape Light

- 8mm (5/16") wide ribbon contains 120 LEDS per meter (36 LEDS per ft)
- Maximum continuous run 5 meters (16.4ft)
- Highly flexible circuit board with 3M adhesive tape that can be applied to most accessible surfaces
- Can cut every 25.4mm (1") and connect with quick connectors
- Durable LEDs with an expected lifespan of 50,000 hours
- Powered by DC 12V power supply, low voltage, and low heat
- No UV, no mercury, and RoHS compliant
- Standard package: 16.4ft/roll
- Requires transformer LEDTF-5A or dimmable LED driver
- 3 Year Warranty
- UL &cUL certified for use in USA and Canada

The LEDS-5 extrusions and accessories allow installers/end-users to create their own finished fixtures. Both the flexible LED tape lights and LEDS-5 extrusions can be cut down to custom lengths. Installers/end-users can apply flexible LED tape lighting to the extrusion, a clear or frosted lens, and end caps for a completely custom light fixture.

Features

- Slim extrusions, ideal for low profile applications
- Optional clear or frosted lense available
- Optional end caps available
- Mounting clips with or without magnets available

Gondola Display LED Panel

The Gondola LED Panel is a direct retrofit solution to upgrade an ordinary gondola into an eye-popping display. You can swap out the entire backboard or choose a smaller section to replace with an LED panel.

LEDPN-046-012-5000k

LEDPN-046-054-5000k

Custom LED Panels

LED panels can be customized for various applications such as lightboxes, signs, product displays, as well as back lighting.

* Please ask your sales representative for information on custom sizes and colors

LED Panel for Commercial Applications

Our **Gondala Track Lighting** offers a complete lighting solution for gondola displays. Mini-sized track can be affixed to the rail of the gondola to provide power distribution for LED strips under each shelf. The LED strips are available in multiple lengths, color temperatures and intensities to ensure the desired illumination.

LEDS-R3 with Adjustable Color Temperature & Dimming

Our new LEDS-R3 adjustable color temperature light is a versatile strip light that can be used in various display environments. Depending on the merchandise being showcased, the color temperature of the light can be adjusted by using the attached remote control, which will enable the quality of the merchandise to stand out.

Features

- Adjustable color temperatures; 2700K, 4000K, 5700K and 6300K
- Wired remote control with screw holes for secured mounting
- Elegant design
- Solid aluminum alloy housing
- Frosted diffuser creates a softer light & eliminates hot spots
- Lifespan: up to 50,000 hours
- Energy efficient
- Maintenance free
- Optional magnetic mounting clips available

The LEDS-SL strip lights were designed specifically for lighting menu boards; due to their inherent features they are an optimal solution for many sign applications. The brightness of the LED, requires a special lens that helps to distribute the lighting evenly, eliminating hot spots. The LEDS-SL strip light series has been certified by UL for sign accessories.

Gooseneck Lamp Holders

The gooseneck series of track lighting is your solution for maximum adjustability. The flexibility of these fixtures allows light from any angle. They are perfect for store and window displays, art exhibits, etc.

NL6624

- Round solid shade track head mounted on 24" flexible gooseneck
- Uses MR16 12V bulbs

NL6630

- Mesh shade track head mounted on 24" flexible gooseneck
- Uses MR16 12V lamp

Available in black or white

Extensions

Stem extensions offer selective accent or task lighting by lowering individual fixtures 18" to 48" from the track. Perfect for dining rooms, bars, game tables, retail displays, and more.

NL0528

- Mini cylinder track head mounted on an extension
- Uses MR16 12V lamp

NL0534

- Track light with a mesh hood mounted on an extension
- Uses MR16 12V lamp

NL Series 120 VOLT Track Fixtures

All fixtures on this page will accommodate R-lamps as well as the latest in LED technology. The two position conductor allows for use with either single or dual circuit tracks.

- Glare, flicker, shadow and UV free
- Built-in USB charger for mobile devices
- Adjustable arm for maximized light coverage
- Power input: AC 100-240V power adapter with DC 12V 2A output
- Dimensions: 7.09" X 6.74" X 17.92"

TL-4000

- Lumen Output: 960 lumen max.
- Color Temperature: 3,300K–6,200K (4 preset modes)
- Dimming: 5 levels
- Glare, flicker, shadow and UV free
- Built-in wireless charger
- Built-in USB charger for mobile devices
- Adjustable arm for maximized light coverage
- Power input: AC 100-240V power adapter with DC 12V 2A output
- Dimensions: 7.125" X 6.75" X 17.92"

LED Switches & Dimmers

Low Voltage LED Lighting Switches

Our low voltage LED switches offer multiple options for turning on & off and/or dimming LED lighting. These switches are commonly used in furniture, cabinets, closets, displays and P.O.P. display applications.

DC POWER SUPPLY

LED LIGHTS

Infrared Door Switch (Single Door)
LED-DS1

- Switch activates light(s) when door is opened and deactivates light(s) when door is closed
- Input voltage: DC 12V/ 24V
- Output: DC 12V/ 24V, 2A Max.
- Output wattage: 24W@12V / 48W@24V
- Size: Ø0.55" x 1.69" [Ø14 x 42.8mm]
- Output/ input cord: 2' 24 AWG
- Mounting: recess or surface mounted
- Bore a 1/2" hole for recess mounting

12
or 24
Voltage

3 Year
Warranty

Infrared Door Switch (Double Door)
LED-DS2

- Switch activates light(s) when one or both doors are opened and deactivates light(s) when both doors are closed
- Input voltage: DC 12V/ 24V
- Output: DC 12V/ 24V, 2A Max.
- Output wattage: 24W@12V / 48W@24V
- Size: Ø0.66" x 0.63" [Ø16.8 x 16mm]
- Output/ input cord: 2' 24 AWG
- Mounting: recess or surface mounted
- Bore a 19/32" hole for recess mounting

12
or 24
Voltage

3 Year
Warranty

Touch Activated Dimmer Switch (w/ Touch Button)
LED-TD5

- On/off touch activated switch with continuous dimming
- Dimming level memory
- Input voltage: DC 12V/ 24V
- Output: DC 12V/ 24V, 2A Max.
- Output wattage: 24W@12V / 48W@24V
- Size: Ø0.66" x 0.63" [Ø16.8 x 16mm]
- Output/ input cord: 2' 24 AWG
- Mounting: recess or surface mounted
- Bore a 19/32" hole for recess mounting

12
or 24
Voltage

3 Year
Warranty

Touch Activated Dimmer Switch (w/ Touch Lead)
LED-TD6

- On/off touch activated switch with continuous dimming
- Dimming level memory
- Activated from sensor lead or from button built-in on the housing
- Mini design can be surface mounted or just hang in-line
- Input: DC 12V/24V, 2A Max.
- Output wattage: 24W@12V / 48W@24V
- Size: 1.97" x 0.67" x 0.36" [50 x 17 x 9.2mm]
- Output/input cord: 3' 24AWG
- 4' touch sensor lead

12
or 24
Voltage

3 Year
Warranty

Motion Activated Switch (w/ Ambient Light Detection)
LED-MS1

- Input voltage: DC 12V/ 24V
- Output: DC 12V/ 24V, 2A Max.
- Output wattage: 24W@12V / 48W@24V
- Size: Ø0.98" x 1.32" [Ø25 x 33.5mm]
- Output/Input cord: 2' 24 AWG
- Mounting: recess or surface mounted
- Bore a 15/16" hole for recess mounting
- Adjustable detection angle:120°
- Ambient light detection: lights only turn on in dark environments when motion is detected --does not activate when there is ambient light
- Activates light(s) for one minute when switch senses movement

12
or 24
Voltage

3 Year
Warranty

Motion Activated Switch
LED-MS2

- Input voltage: DC 12V/ 24V
- Output: DC 12V/ 24V, 2A Max.
- Output wattage: 24W@12V / 48W@24V
- Size: Ø0.55" x 1.56" [Ø14 x 39.5mm]
- Output/Input cord: 2' 24 AWG
- Mounting: recess or surface mounted
- Bore a 1/2" hole for recess mounting
- Activates light(s) for one minute when switch senses movement

12
or 24
Voltage

3 Year
Warranty

Touch Dimmer

Three-stage touch dimmer is designed for use in conjunction with select LED fixtures. The included 60 inch long touch-sensor lead can be connected to any metal surface or with our TP1 touch pad. One touch on the sensor turns fixture on, second touch increases output to medium, third touch maximizes output, and fourth touch turns it off.

LED-TD3-150

- Three stage touch dimmer
 - Touch 1: Night light
 - Touch 2: Energy saver light
 - Touch 3: Bright reading light
 - Touch 4: Off
- Rating: AC 120V 150W
- Easy intallation by fastening two screws
- Dimensions: 3½" x 1¾" x 7⁄8"
- For use only with LEDP-100 series
- UL & cUL certified for use in USA & Canada

Touch Switch

LED-TD3-015

- Touch switch on/off
- Rating: AC 120V 150W
- Easy intallation by fastening two screws
- Dimensions: 3½" x 1¾" x 7⁄8"
- Works with select LED products
- UL & cUL certified for use in USA & Canada

Touch Activated

3 Year Warranty

120 Voltage

CERTIFIED

LED-TD1-36W-12V

- Three stage touch dimmer
 - Touch 1: Night light
 - Touch 2: Energy saver light
 - Touch 3: Bright reading light
 - Touch 4: Off
- Rating: DC 12V 36W
- Easy intallation by fastening two screws
- Dimensions: 3½" x 1¾" x 7⁄8"
- For use only with select LED products

Push Switch

PW3

- 10’ SPT-2 power cord
- 120V 300W push switch
- 3’ female polarized connector w/3 outlets
- Size: 3½” L x 7⁄8” H x 1¼” W
- UL & cUL certified for use in USA and Canada

Dimmer

Full range dimmer is designed for use in conjunction with incandescent or halogen fixtures. 1½” threaded stem can be used for panels up to ¾” thick. Knobs are available in either gold or black finish.

DM3

- 10’ SPT-2 power cord
- 120V 300W dimmer switch
- 3’ female polarized connector w/3 outlets
- UL & cUL certified for use in USA and Canada

DM3-S

- 10’ SPT-2 power cord
- 120V 300W dimmer switch with brass turn switch
- 3’ female polarized connector w/3 outlets
- UL & cUL certified for use in USA and Canada

TD3

- 10’ SPT-2 power cord
- 120V 300W touch dimmer
- 3’ female polarized connector w/3 outlets
- 5’ touch sensor lead
- UL & cUL certified for use in USA and Canada

Transmits IR Signals into Closets & AV Cabinets

You shouldn’t have to leave cabinet doors open when you’re enjoying your home theater. Keep your A/V devices hidden by setting up an **IR REPEATER** (IR-800) in your entertainment center, and be able to control A/V devices hidden in cabinets or closets.

3 Year
Warranty

Features

- Standard set includes: one receiver, one emitter, a control box, and a 5V DC adapter
- Control box supports up to 8 emitters
- System feedback LED indicator provides visual status of operation
- Emitters have shelf pin for easy installation and removal
- Emitters also have integrated mounting wings that allow for horizontal and vertical installation
- UL & cUL certified power supply with universal voltage capacity

National Lighting's dimmable LED drivers are built with an advanced thermal management system. They are efficient and meet the latest safety regulations. Patented Multilayer Graphene technology is used on the transformer housing which offers superior heat management and lowers temperatures up to 30% compared to traditional materials. With an integrated

thermal fuse and overload circuit breaker, our dimmable LED drivers are safe and reliable. The dimmable LED drivers are ideal for 12V or 24V DC LED ribbon/tape, LED puck lighting, LED down lighting, and other LED accent lighting applications. Simply slide your wall dimmer to enjoy flicker free, ultra smooth dimming.

Magnetic drivers typically eliminate flickering issues often associated with dimming LEDs

Features

- Compatible with most MLV (magnetic low voltage) dimmers
- Patented Multilayer Graphene (MLG) technology for thermal management
- Wiring compartment with removable cover for easy installation
- Wiring compartment with 2 knockouts that accept 3/4" conduit
- 16-18 AWG input leads and 12-16 AWG output leads
- AC input has an auto reset overload protection feature and 105° C thermal fuse
- Overload circuit breaker on DC output side
- ETL Listed for USA and Canada
- Conforms to UL 8750 & 1310 standards
