# Important Information

## Technical information

While every effort has been made in the production of this catalogue to ensure the accuracy of information, our products are continually being revised and users should confirm the up to date specification before ordering. Due to constant improvement of products presented in the catalogue, we can make changes at any time and without notice.

## Responsibility

It is the responsibility of the user to ensure the fitness of hardware for the intended purpose. We recommend assessment by appropriate testing in the application and by technical enquiry to our representatives.

## Intellectual property

Titus Group owns the intellectual property rights in its products worldwide whether as trademarks, patents, intellectual, copyright, designs, illustrations, drawings and the 'know how' contained in their design and production. Titus Group respects the equivalent rights in competitors and all other relevant product design rights. To our knowledge our products do not infringe any intellectual property rights of competitors or other parties. Titus Group takes infringements of its rights seriously and will rigorously defend these rights to the full extent of the law.

## \*Non preferred articles

All Item numbers in the catalogue marked with \* are for non preferred items available on extended delivery times.

## Trademarks

Titus and Titusonic are registered trademarks of Titus International Ltd. Lama is a registered trademark of Titus d.o.o. Dekani, WoodWelding is a registered trademark of WW SA.

# Connectors

## Information

### Why Choose Titus?

#### Titus connectors add value to furniture and to furniture manufacturing

Titus connectors improve the quality of furniture and lower the cost of manufacturing and assembly while ensuring a high degree of customer satisfaction.

#### The most advanced range of connectors available on the market

**Precise and efficient** product design. **The broadest possible range of drilling tolerances** ensures reliable assembly and consistently strong joints. **'Klix'** locking feature, the engagement of interlocking teeth on cam and dowel, to prevent joint loosening in service or transit.

**Expanding function** provides degrees of variation in out-of-tolerance drillings ensuring stronger joints and improved quality of furniture.

**Twinstart thread** for faster and more stable insertion.

**Depth stop collar** prevents over-insertion.

**Firm tightening** for greater confidence in use.

**Cam locks at 230°** assuring smooth tightening action and greater dowel pull-up.

**Quickfit** for hand dowel insertion.

**Quickfit TL5**, new generation steel dowel with quickfit expando technology for insertion in Ø5mm dowel holes.

**Quickfit TL2, TL4** with the built-in self adjustment feature for higher drilling tolerances.

**Quickloc** one piece fitting for faster assembly with integrated expanding cam and dowel.

**Zinc+steel dowel** for optimal strength and performance.

**Precise dowel manufacturing** high precision of zinc and strength of steel assures 100% dimensional accuracy.

#### Easy and quick consumer friendly self-assembly of furniture

Self-assembly furniture offers consumers good value and instant availability of products.

With the aim of providing consumer with simpler instructions, fewer parts and an easier assembly process, Titus has significantly reduced and simplified the number of fittings traditionally required in furniture production.

Titus connectors provide consumers with easy assembly and furniture producers with increased productivity:

- reduced number of assembly parts
- easy assembly instructions
- security of packed parts during transit

**CAF** Quick & Easy

Consumer Assembly Friendliness

## Easy and Quick Furniture Assembly

### CAF formula

CAF=Consumer Assembly Friendliness

Titus CAF formula provides a comparative measure for customer satisfaction. By using it manufacturers are able to evaluate their products internally or against those of their competitors.

While offering consumers easier and faster assembly, there are obvious advantages also for furniture manufacturers – buying, counting, bagging and stocking of fittings can be greatly reduced.

$$\begin{array}{l}
 \text{T} \text{ Total quantity} + \text{A} \text{ Actions} \times \text{N} \text{ Number of} \\
 \text{of parts} \quad \text{to assemble} \quad \text{types of parts} \\
 \begin{array}{cccc}
 5 & 8 & 6 & 3 & 7 \\
 6 & 1 & 5 & 7 & 2 & 4 \\
 1 & 6 & 9 & 7 & 1 \\
 8 & 2 & 1 & 5 & 4 & 9
 \end{array}
 \quad
 \begin{array}{c}
 \nearrow \\
 \rightarrow \\
 \searrow \\
 \downarrow
 \end{array}
 \quad
 \begin{array}{cccccc}
 1 & 2 & 3 & 4 & 5 & 6 \\
 1 & 2 & 3 & 4 & 5 \\
 1 & 2 & 3 & 4 \\
 1 & 2 & 3 \\
 1
 \end{array}
 \end{array}$$

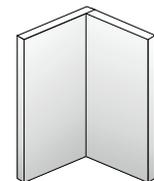

**(T+A)N = CAF**

Minimise the numbers in the Titus CAF™ formula to achieve:

- High customer satisfaction
- Improved productivity
- Higher profits

### How does it work?

Comparative CAF scores to assemble a hand held demonstrator

	T	A	N	CAF
Connecting screw (traditional assembly)	4	38	3	126
Cam & dowel with single start thread	6	21	4	108
Cam & dowel with twinstart thread	6	15	4	84
Cam & TL2 dowel (self-assembly)	6	7	4	52
Cam & TL2 dowel (factory pre-inserted)	2	3	2	10
Quickloc	2	3	1	5
Fully assembled demonstrator	1	0	1	1

# System 1

## Fittings for Rigid Assembly Systems

### System Features

#### Double locking carcass screw

- Zinc diecast for precision
- Titus Double locking carcass screw makes an almost invisible connection
- Collar under the head to pull panels together
- 2nd 'lower' thread pulls against a 'faster' thread to provide maximum connection force and prevents overdriving of fastener
- Almost invisible in position
- Head can be 'fastcapped' or filled

#### Hi-Lo™ carcass construction screw

The Hi-Lo™ carcass construction screw (CCS) offers a strong, tolerant and cost effective connection with minimal panel preparation.

The combination effect of the elements of a Hi-Lo™ screw means

- A greater differential between drive torque and strip torque in fibrous and particle materials to ensure a reliable and repeatable fixing
- Hi-Lo™ threads provide minimum bursting forces
- 'Hi' thread gives low bursting component force from the sharp 30 degree angle thread
- 'Lo' thread at 60 degree angle uses the vertical force component to press fibrous and particle components of panels onto the 'Hi' thread and are contained by their greater height
- The very small shank on a Hi-Lo™ screw means less material displacement than conventional threads and enables minimum or partial drilling of pilot holes for quicker panel processing

#### Barrel nut (plastic)

- Used with Titus Hi-Lo™ screws
- Titus barrel nuts provide maximum strip torque for reasonable drive torque
- Capable of multiple reconnection repeatability

#### Cover caps

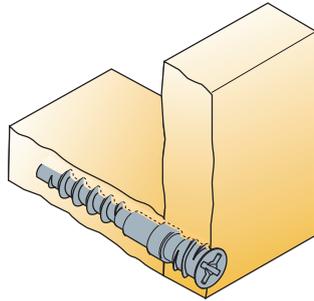

- Available in multiple colours
- All recess and head types offered
- High quality engineering polymers used in their construction
- Uniformity of holding with good tolerance
- Wide range of application and use conditions

# System 1

## Fittings for Rigid Assembly Systems

### Double Locking Carcase Screw

- High performance from widely spaced primary thread
- Finer secondary thread provides additional holding power and positive stop (no override)
- Increased support for vertical panel is gained from the funnel head with collar at its base
- One-piece fitting

## Fittings for Face-boring Applications

### System Features

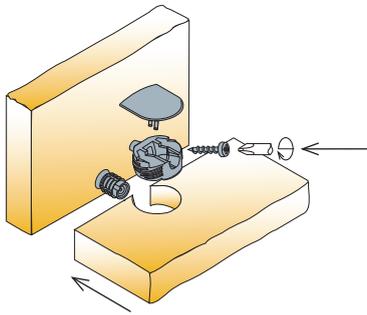

A family of face boring only concealed fittings and rail fasteners with wide tolerances and the enormous clamping power of an angled screw.

- Factory or site component installation
- Wide tolerances
- Face boring only
- Cover caps for concealment
- For kitchen, furniture storage, office and store fixture applications
- Non twist rail fastener versions
- Multi use 'pocket screw' replacement

# System 2 Fittings for Face-boring Applications Concealed Fittings

- Combination of hi-thread screw and nylon insert allows a high clamping force improving cabinet rigidity
- Unlimited stacking height due to flush housing
- Provides a strong, secure fitting which eliminates the need for edge boring
- +/-1mm tolerance absorbs drilling inaccuracies improving consumer confidence in use

# System 3

## Fittings for Face and Edge Boring

### System Features

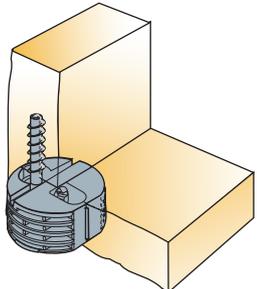

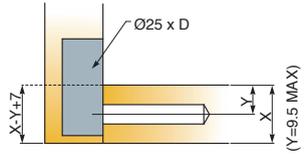

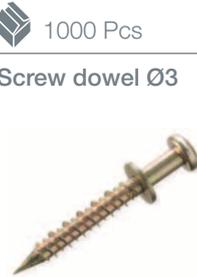

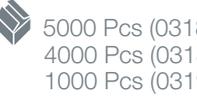

Titus System 3 is a two component rigid face and edge drilled fastening with half turn to fasten. System 3 offers almost full concealment and wide tolerances in use.

- Automatic or in-factory placement
- Pre-location pin ensures ease of assembly
- Less than one turn of a screwdriver to fasten
- Shelf edge installation of pin means maximum shelf cut size tolerance
- Can be used on 12mm shelf panels
- No loose parts for maximum convenience in RTA
- Drawer front fixing, cabinet construction

# System 3 Fittings for Face and Edge Boring Concealed Housing

- One turn locking system reduces assembly time, both in the factory and home
- Pre-assembly feature for consumer convenience
- Choice of dowels to suit drilling
- Hi-Lo screw feature for faster insertion

## Fittings for Face-boring Only

### System Features

Cost effective one piece fittings with face boring benefits

- Flush and block components
- Face-boring only
- Good tolerances
- One piece connectors
- Angledriv versions fastening with maximum driving power and flexibility
- Quickloc™ versions need only one turn to tighten for fast assembly
- Foolproof consumer home insertion

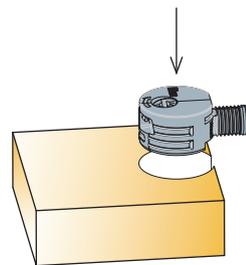

### Quickloc™ One-piece connector

The integrated housing and dowel make Quickloc™ the most user-friendly and tolerant product available.

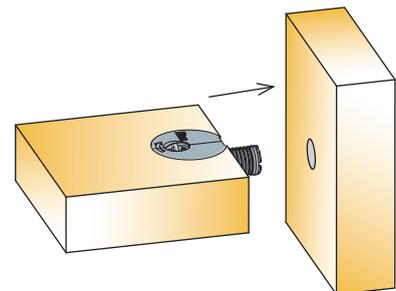

- High degree of drilling tolerance
- Push-in design
- Tool-free insertion
- Integrated expanding housing and dowel provide consistently stronger joints
- 'Klix' locking system

### Quickloc™ Assembly

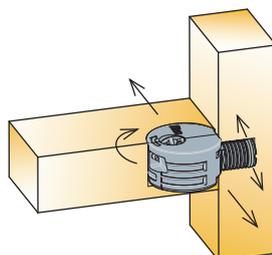

1. Press Quickloc into the face board

2. Assemble the panels

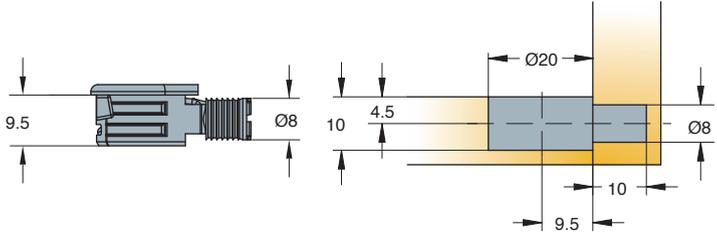

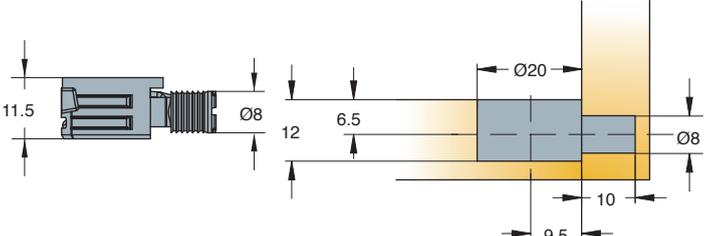

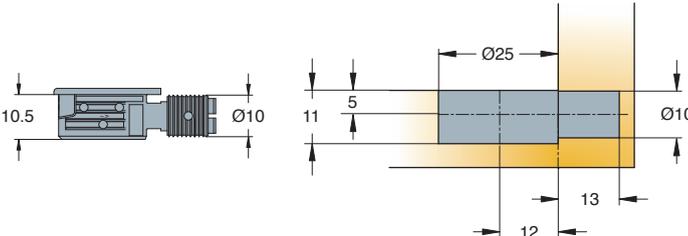

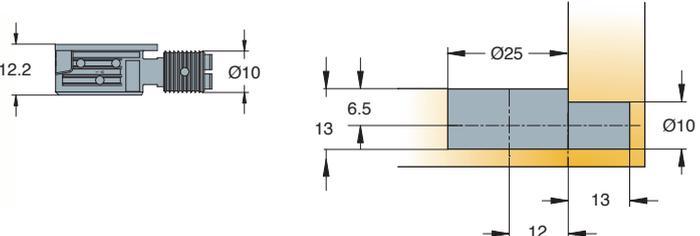

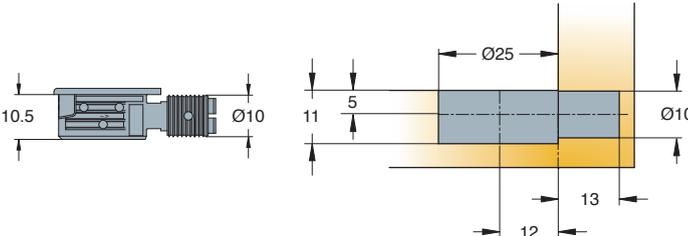

3. Tighten in less than one turn

# System 4 Quickloc™ One Piece Expanding Connector

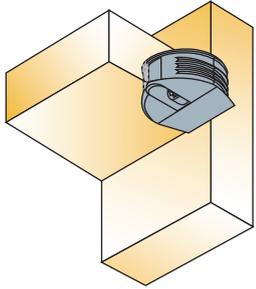

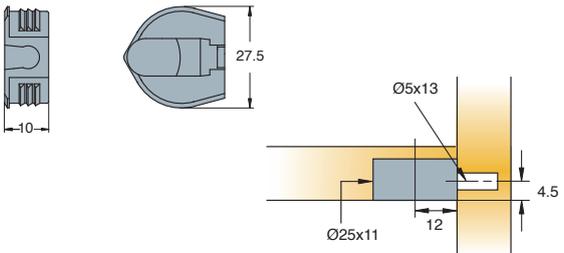

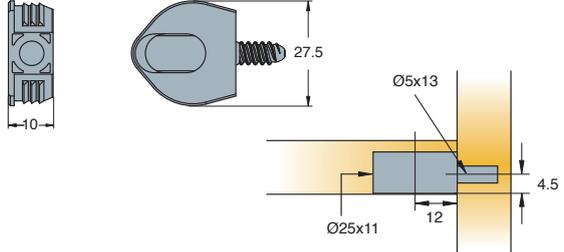

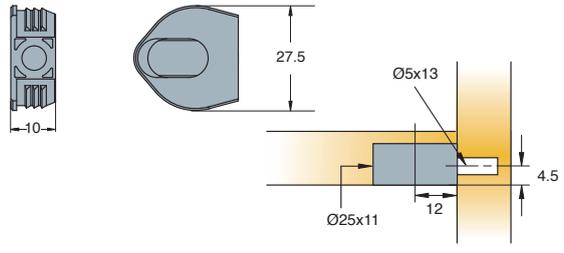

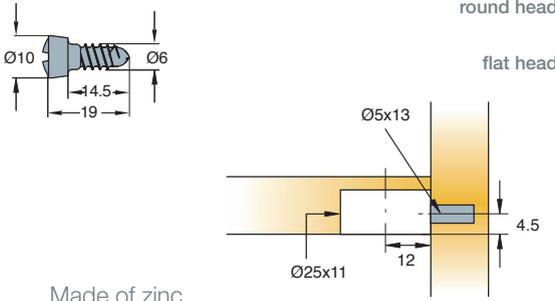

- An innovative, one-piece connector, capable of hand insertion
- Is highly tolerant and tightens in less than one turn
- Is a face-bored product
- Offers a high degree of drilling tolerance and is the only connector of its type to provide pull-up of cabinet panels when tightened

# System 5 Cams and Dowels

## System Features

### The most advanced cam and dowel range

Titus System 5 is a comprehensive range of cam and dowel connecting fittings with 'Klix' and Quickfit features for all cabinet applications: panel-to-panel, panel-to-hollow profile, back-to-back

#### Dowels

- **Quickfit TL5, 'Full metal jacket'**  
a high performance Quickfit dowel for use in multiple wooden materials
- **Quickfit TL2, TL4, TL5 dowels**  
a unique solution for factory pre-insertion, high level of drilling tolerances

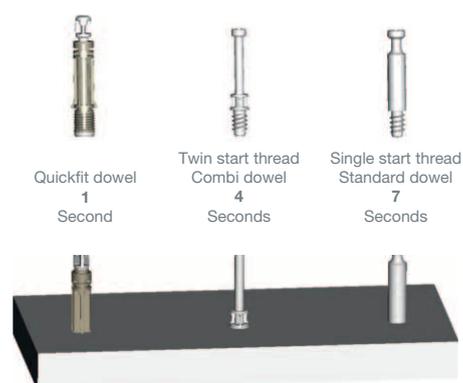

- **Quickfit dowels**  
quick hand insertion, easy assembly
- **Diecast dowels (zinc)**  
precise manufacturing, optimal shape and design
- **Turned dowels (steel)**  
'traditional' design, smooth surface, best strength performance
- **Combi dowels (zinc and steel)**  
high precision of zinc, strength of steel, 100% dimensional accuracy and optimal performance

### Titus 'Klix'<sup>TM</sup>

Titus 'Klix' locking system ensures the engagement of the interlocking teeth on cam and dowel providing:

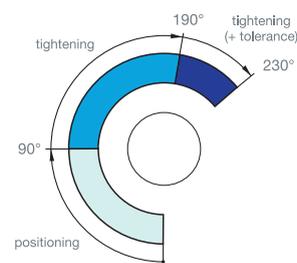

- vibration-proof joint
- rigid construction that will not loosen in service or transit

### Dowel insertion time comparison

### 2 o'clock lock Smooth closing

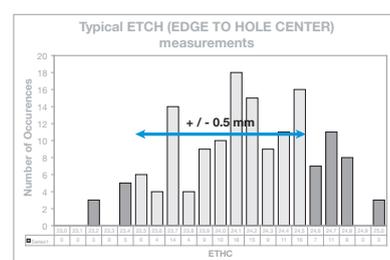

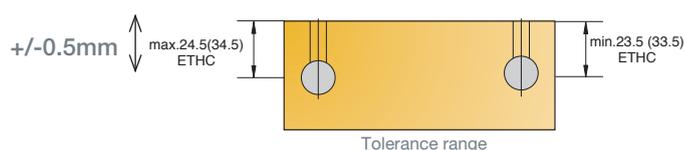

Linear cam profile assures smooth, firm tightening action and greater pull-up. The cam always locks at 2 o'clock lock (230°), enabling greater consumer confidence in use while improving furniture quality.

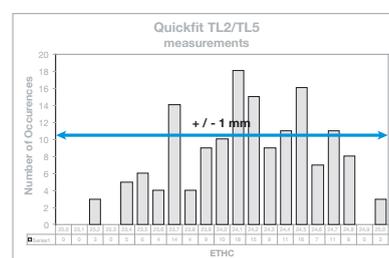

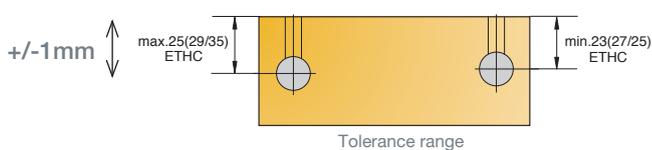

## Drilling tolerances

Optimal performance and perfect joint even with inaccurate drillings.

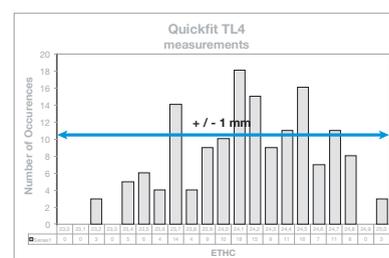

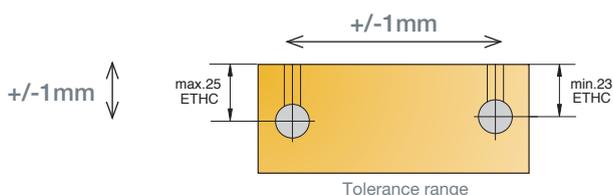

Zinc/Combi dowel

Quickfit TL5 dowel, Quickfit TL2 dowel

Quickfit TL4 dowel

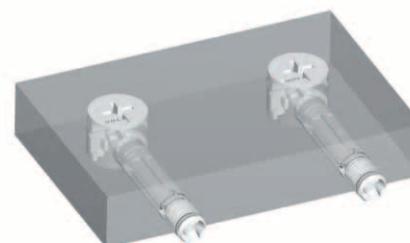

ETHC=Edge To Hole Center

## Dowels for factory insertion

Quickfit TL5, Quickfit TL4 and Quickfit TL2 are the only available dowels allowing factory preinsertion

- Easier packing
- Less damages in handling
- Perfect for the RTA market

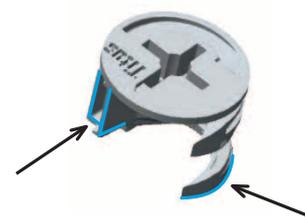

# System 5 Cams and Dowels

## Cam5000

### Highly resistant joint for strong cabinet construction

Reinforced cam evenly engages the hole and prevents cam tilting and cam bursting.

Increased joint resistance enables effective performance in wider tolerance range.

### Linear cam profile

Linear cam profile ensures:

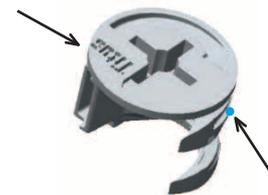

- Smooth tightening action
- Greater dowel pull-up

### Cam retaining pips

Cam retaining pips ensures:

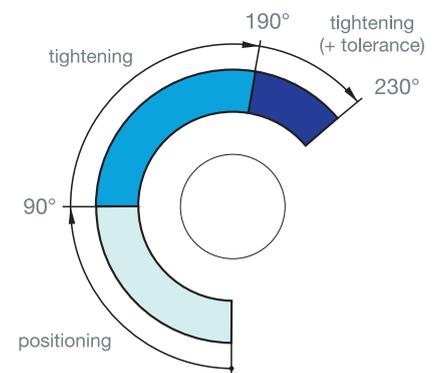

- The cam is held in position prior to assembly
- Secure cam positioning during transport and handling
- Accurate factory insertion

### 2 o'clock lock

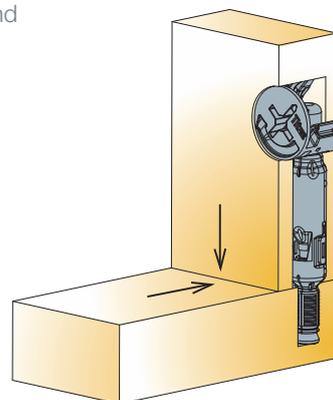

Smooth and noticeable locking at the 2 o'clock position guarantees:

- always-right tightening for home assembly
- strong and rigid cabinet construction

### Optimised cam profile

Optimised cam profile ensures smooth and tight joint with no gap between panels.

### Optimal performance with all Titus dowels

Quickfit TL, Quickfit, Combi, end, double ended, angled and other screw-in dowels

# System 5 Cams and Dowels

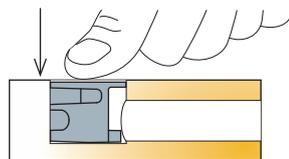

## Quickfit Connectors

It is the fastest assembly system on the market. The Quickfit™ dowel may be inserted by hand, using only finger pressure. This eliminates the labour intensive process of screw-in assembly and the potential panel damage.

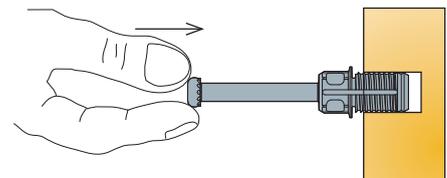

The Quickfit™ range of dowels has been extended to provide a complete family of fittings available in diameters of 5mm, 8mm and 10mm and lengths of 24mm and 34mm. These dowels are compatible with the range of TitusØ15mm cams.

### Assembly

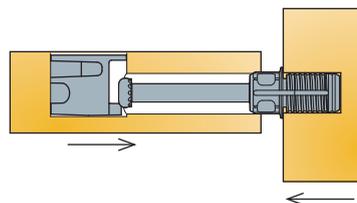

1. Press the cam into face board

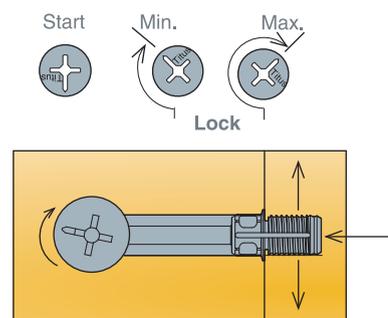

2. Insert the dowel into side panel

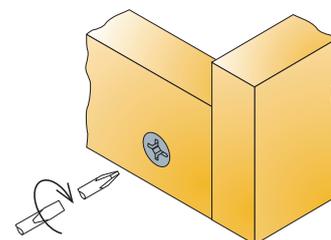

3. Assemble the panels

4. Tighten the cam to lock dowel

5. Assembled panels

## Quickfit TL Connectors

Quickfit-TL™ dowel offers furniture manufacturers a fast assembly system providing high drilling tolerances. It has a built-in self-adjustment feature, which enables common drilling inaccuracies to be overcome.

For the self-assembly furniture consumer, Titus Quickfit-TL™ is the most consumer friendly fitting on the market. Apart from the benefit of fully tightened joints and easy locking into the same position, Quickfit-TL™ provides an exceptionally smooth action when tightened, requiring very little effort.

### Drilling tolerances

Marginal inconsistencies of drilling and the problems associated with the natural movement of wood panels, no longer present problems.

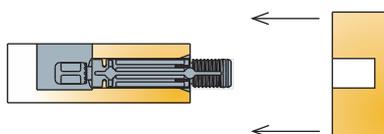

Quickfit-TL™ provides a tolerance of  $+1/-1$ mm on drilling operation while ensuring that the final result is a perfectly precise and aligned joint. No other assembly fittings system can offer such tolerances and still maintain a perfect joint.

### Assembly

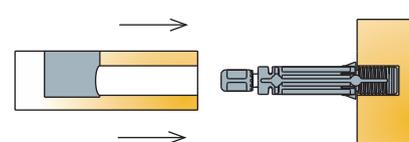

#### 1. Press the cam into face board

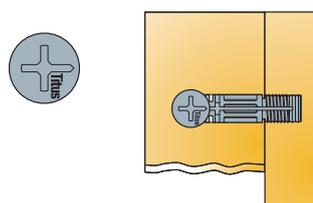

#### 2a. Either push dowel into edge hole or...

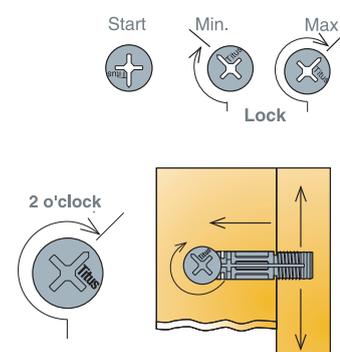

#### 2b. Insert the dowel into side panel

#### 3. Assemble the panels

#### 4. Tighten cam to lock dowel

# System 5 Cams and Dowels

## Quickfit TL5 'Full Metal Jacket'

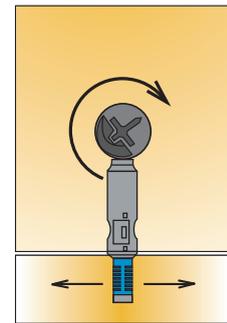

### Effective performance in multiple wooden materials

- Smooth and noticeable locking at the 2 o'clock position guarantees:
- tight joints
  - always-right tightening at home assembly
  - strong and rigid cabinet construction

### Strong and reliable joint

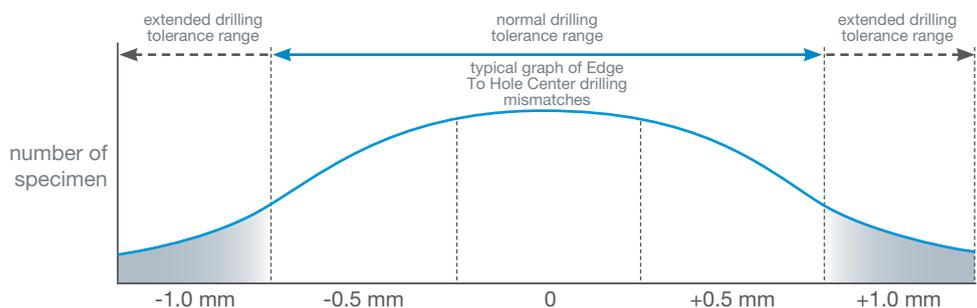

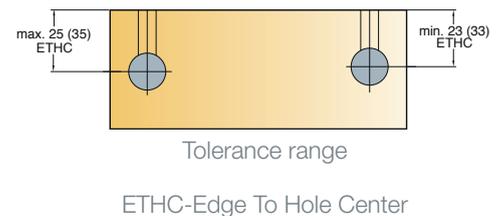

Expanding steel sleeve assures high resistance to torsion and pull-out.

### High drilling tolerances

An extended dowel head design works as a positive stop against the cam and provides an ETHC tolerance of min. +/-1mm

Fully tightened joint assured even at marginal inconsistencies of drilling and problems associated with the natural movement of wood panels.

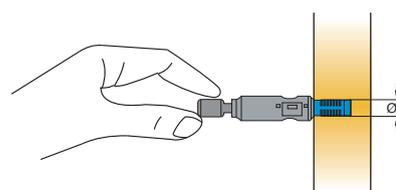

### Shape of dowel sleeve

- Acts as a positive stop when face inserted
- Ensures correct insertion depth

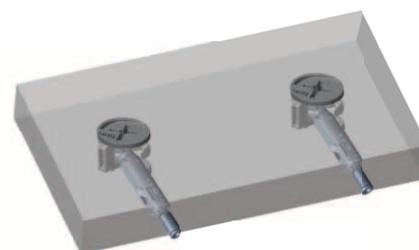

### Tool-free insertion for Ø5mm dowel holes

Quickfit TL5 reliably engages the 5mm dowel hole. It enables the usage of tool-less Quickfit dowel insertion technology across a wide range of applications.

### 50% less time to assemble the cabinet at home

When edge inserted the dowel engages the cam and remains securely positioned until the boards are locked together.

For maximum efficiency the insertion process can be automated using the Titus proprietary Lama FastFit machine.

Fast and easy cabinet assembly at home.

**CAF** Quick & Easy

Consumer Assembly Friendliness

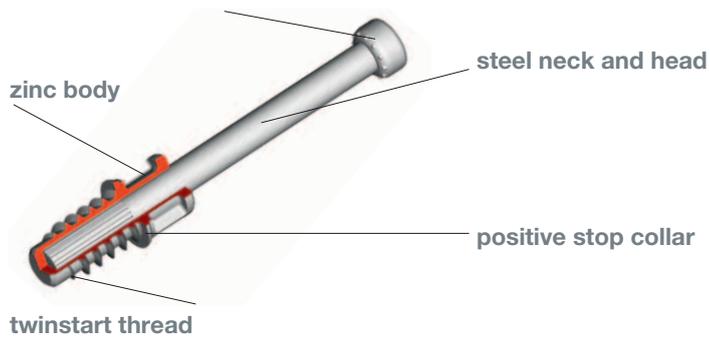

# System 5 Cams and Dowels

## Zinc+steel Combi Dowels

**Zinc+steel  
technology for  
optimal strength  
and performance**

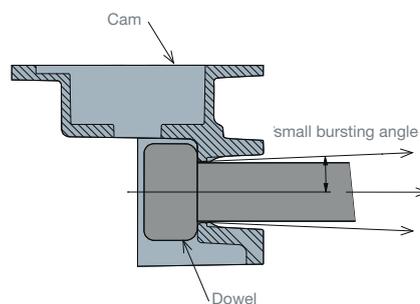

The Combi dowel combines steel and a small amount of zinc to ensure high precision and dimensional accuracy, essential to provide furniture manufacturers with the broadest possible range of drilling tolerances.

**toroidal head form**

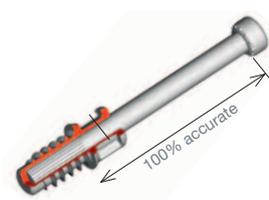

**The steel neck and head** provide better resistance to torsion and pull-out enabling a high performance joint

**Zinc body:**  
**Positive stop collar** ensures correct insertion depth  
**Twinstart** for faster and more stable insertion

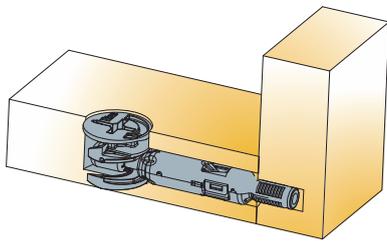

**The toroidal dowel head form** transfers the forces between cam and dowel more effectively resulting in a small cam bursting force.

**100% dimensional accuracy  
assured**

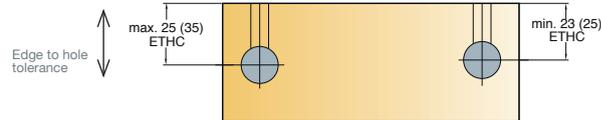

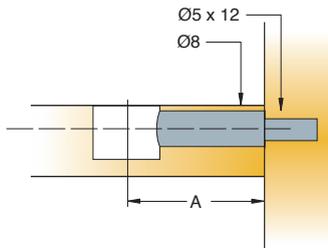

# System 5 Quickfit TL5 'Full Metal Jacket'

- Tool-free insertion technology for Ø5mm dowel holes
- Drilling tolerances of +1/-1mm when edge or face inserted
- Expanding steel sleeve assures a strong joint, highly resistant to pull-out
- Functions in multiple wooden materials (chipboard, MDF, solid wood)

## Cams and Dowels

### Quickfit TL Dowels

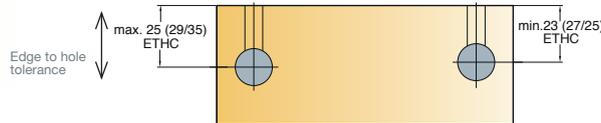

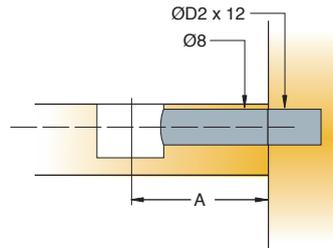

- Available in Ø5mm and Ø8mm for panel-to-panel applications
- Suitable for use with all Ø15mm Cam2000, Cam3000 and Cam5000 products
- 'Klix' locking feature provides a strong, vibration proof joint
- Highly tolerant in edge-inserted, TL4 also in face-inserted applications

## Quickfit-Expando

### Connectors

## System Features

A face boring connector family for 32mm system drilling with full range of panel and application variants for all cabinet manufacturing applications

- Minimum drilling requirements
- Linear cam design for constant tightening loads when driving
- Angledriv feature on cam for maximum driving comfort
- Interchangeable pins for wood, plastic and steel applications
- Pins with twinstart drive for fast insertion
- Interchangeable Quickfit pin fastenings available
- Toolless fastening capable versions
- Back-to-back fastenings for common vertical panel fixing of shelves

System 6 consists of a range of 20mm and 25mm diameter housings, Quickfit™ and conventional dowels, end dowels and double ended dowels.

Housings are made from high grade plastic or zinc, with zinc cams.

Wedgefix-6 connector is a special fastener without cam, simply to snap onto a pre-inserted dowel.

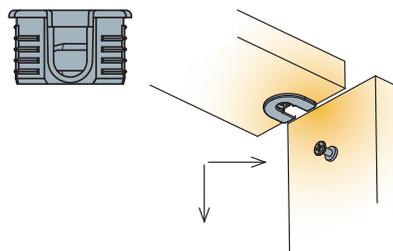

## Applications

Titus System 6 is ideal for use in high volume production of case goods, closet and garage storage systems. Because no

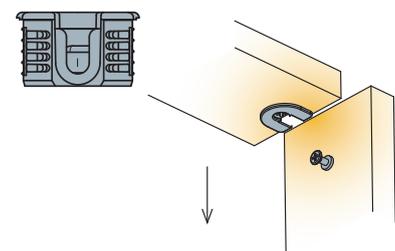

edge boring is required, it is an excellent choice for manufacturing environments with limited drilling capacity.

## Side-entry Drop-on

**Side-entry** insertion of shelf panel: from the side or from the top

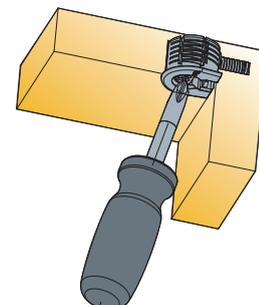

**Drop-on** insertion of shelf panel: only from the top  
Using drop-on connections allows for one-man installation

## Angledriv feature

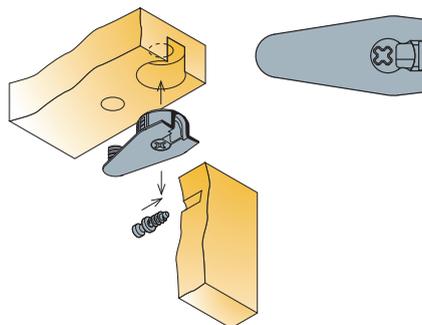

The angledriv feature on the cam allows for the angled position of the screwdriver with the locking action creating a tight and secure joint.

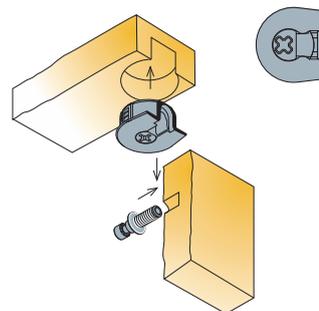

# System Features

## Outrigger/ Non outrigger

Outrigger

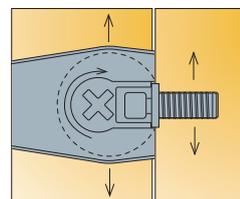

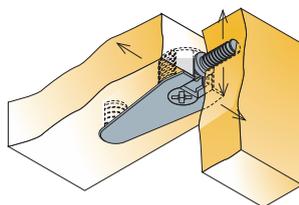

Non outrigger

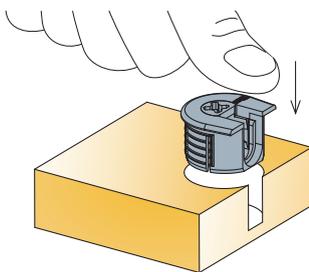

## Expando function

Expanding housings and dowels provide a tight joint.

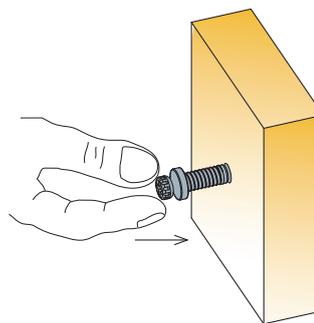

## Assembly

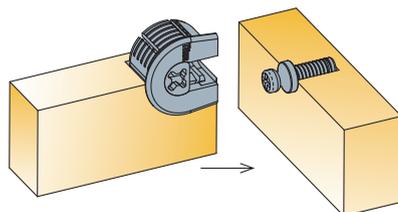

1. Press the housing into face board

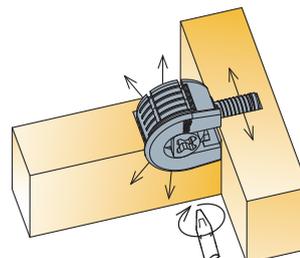

2. Press the dowel into side panel

3. Assemble the panels

4. Tighten the joint

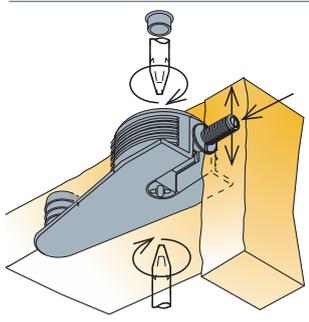

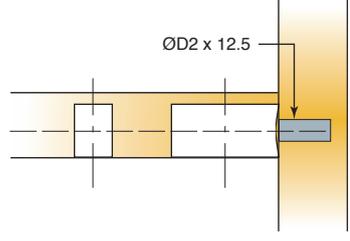

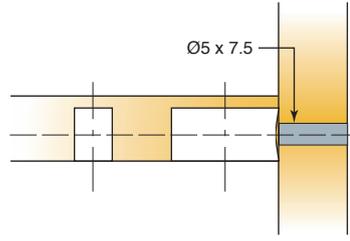

# System 6

## Quickfit-Expando

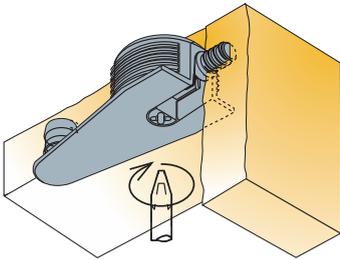

### Expanding Dowels

- Available in Ø5mm, Ø8mm and Ø10mm for panel-to-panel, panel-to-hollow profile and back-to-back applications
- Suitable for applications with all Titus Ø20 and/or Ø25mm Expando-6 housings
- 'Klix' locking feature provides a strong, vibration proof connection
- Depth stop collar for accurate insertion

## Application

### Glissando TT 'one for all'

#### T-type

- One item fits multiple applications
- Same item can be used on all crankings and angled hinges
- Designed to fit the concealed hinge cup
- Toolless mounting
- Suitable for different types of cabinets for kitchens, living rooms, bathrooms and other furniture

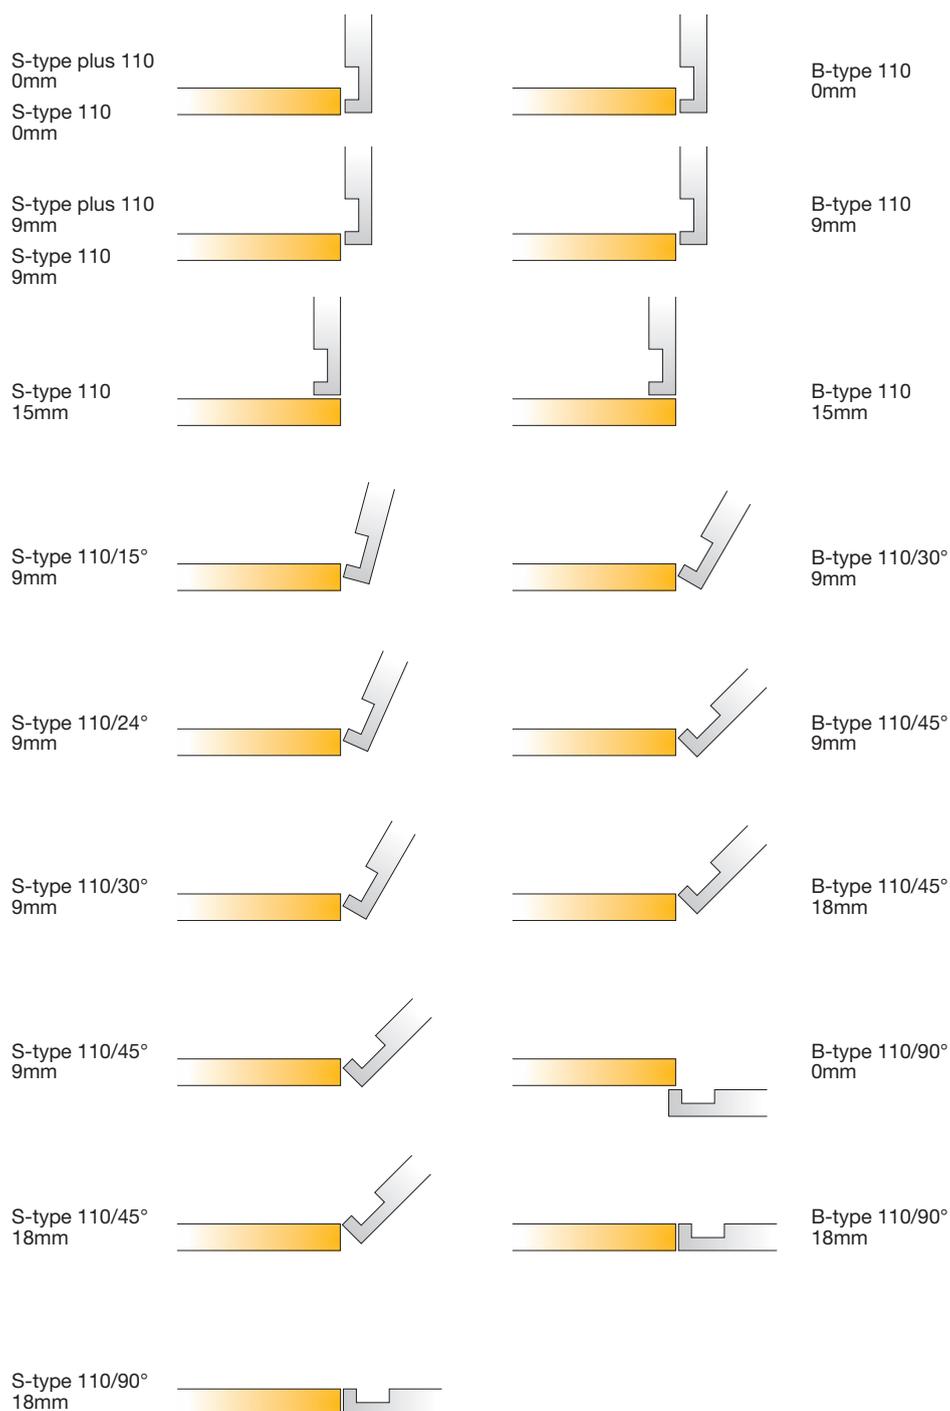

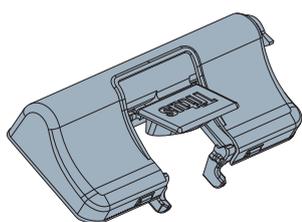

# Glissando

## Application

### Glissando TL 'one for all'

#### S-type B-type

- One item fits multiple applications
- Same item can be used on all crankings and angled hinges
- Adjustable damping enables perfect functioning on every door
- Designed to fit the concealed hinge cup
- Toolless mounting
- Suitable for different types of cabinets for kitchens, living rooms, bathrooms and other furniture

# Glissando

## Number per Door and Positioning

Titus Glissando soft closing devices can not be used with free-swinging door hinges.  
 → ver detalles en la página 3.24

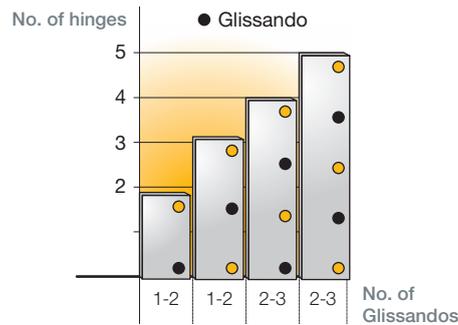

### How Many Glissandos per Door?

#### Add-on hinge soft closing solution

Glissando TL  
 Glissando TT  
 Glissando TL 170

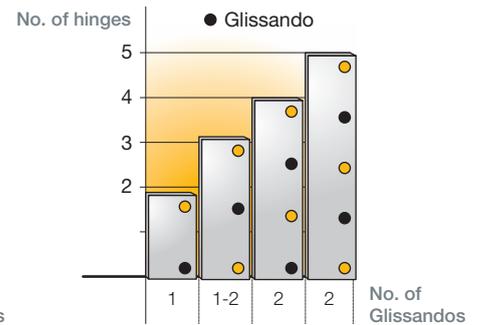

Mount Glissando on the bottom hinge in case of 2 hinges on the door or on the middle hinge in case of 3 hinges on the door.

Glissando TT

Recommended number per door and positioning

Glissando TL,  
 Glissando TL170

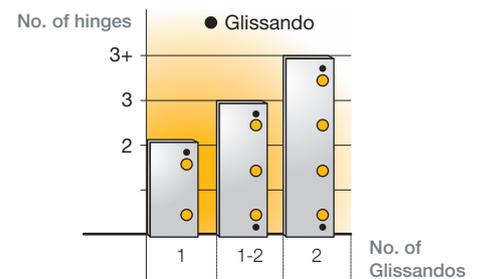

Recommended number per door and positioning

#### Stand-alone soft closing solution

Glissando CR

Mount Glissando CR on the hinged side of the cabinet on the top or bottom.

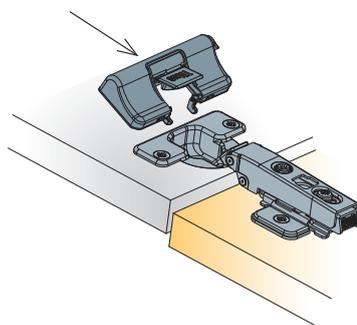

Recommended number per door and positioning

# Glissando Mounting

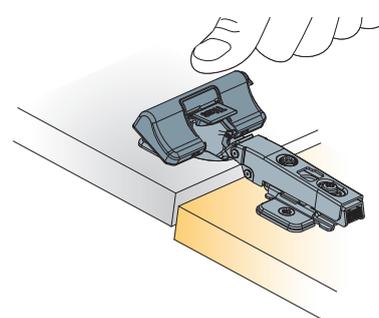

## How to Mount Glissando?

### Tool-less mounting

Glissando TL  
Glissando TT  
Glissando TL 170

Simple toolless assembly: Insert Glissando into the holes on the hinge and press down with hand.

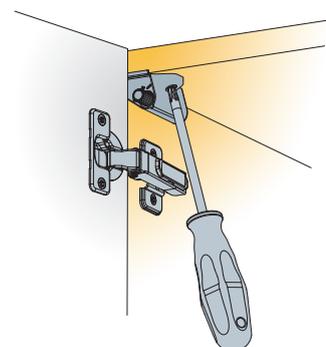

The tool-less 'snap on' version for reduced assembly time and flexibility of application. Glissando TL can be mounted at any time after furniture assembly so can be offered as a retro fit option by the installer.

### Screw-on into the cabinet corner

Glissando CR

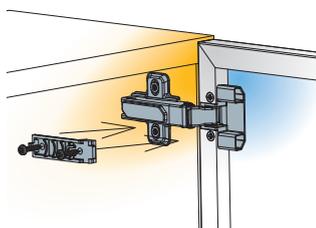

Glissando CR is mounted into the cabinet corner by using chipboard screws 20mm long.

Glissando dampers' discreet design enhances the look of the door and occupies minimal space in the cabinet interior.

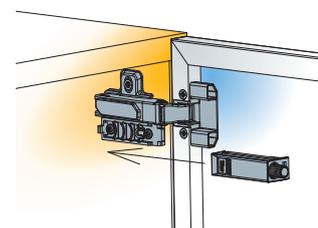

### Screw-on onto the mounting plate

Glissando AL

Position the mounting plate below the hinge arm and fix with two screws. Use hinge mounting plate as a reference.

Slide Glissando AL onto the mounting plate

# Glissando

## Damping Adjustment

### How to Adjust Damping?

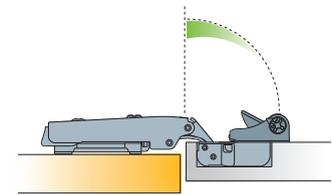

#### Add-on hinge soft closing solution

Glissando TL  
Glissando TL 170

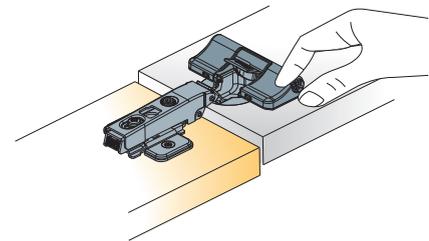

Glissando features quarter turn adjustment to provide optimal closing speed for any door dimensions and weight.

The damping function can be adjusted to fit different door weights which enables

- perfect door functioning
- use of the same type of Glissando for various doors

Adjustable damping zone

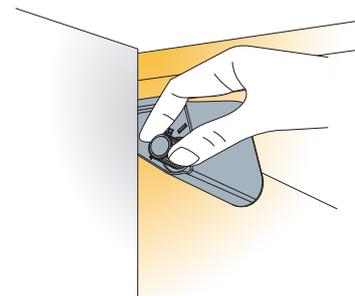

Turn towards '+' to increase and '-' to decrease the damping

#### Stand-alone soft closing solution

Glissando CR  
Glissando AL

Turn towards '+' to increase or towards '-' to decrease the damping.

# Glissando

## Titus Damper Inside

### Titus Hydraulic Damper

#### Efficient modular design

- Low number of assembly parts enables quick development of customised solutions
- Engineered for efficient and high precision manufacturing
- Wide range of applications

#### Wide operating scope

- High coefficient  $\gamma$  of Titus damper assures efficient damping at any closing speed
- Damping force can be easily adapted to customer needs

$$\gamma = \frac{F_H}{F_L}$$

$F_H$  – damping force at slam speed (12mm/s)  
 $F_L$  – damping force at slow speed (1mm/s)

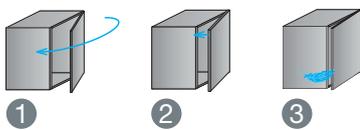

#### Reliable damping and closing at any speed

Higher coefficient  $\gamma$  means reliable damping at high speed and ensures that the system will reach its final position even at very slow speed

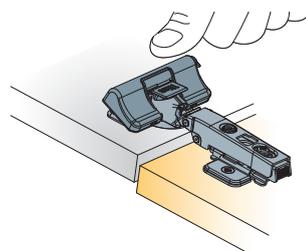

# Glissando Soft Closing Systems for Hinges

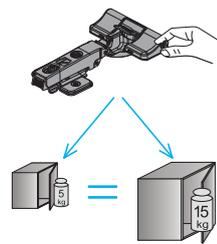

## 'ConfidentClose'

- 1 Fast closing
- 2 Late start of deceleration action
- 3 Quiet landing with 'SoftTouch'

## Tool-less mounting

- Reduced assembly time
- Flexible usage also as a retrofit option

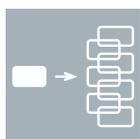

## Adjustable damping

- Consistent performance across a broad range of furniture doors of different dimensions and weights

### Easy tool-less adjustment

- Intuitive adjustment procedure
- Controllable motion

### One for all

- One item fits multiple applications
- Same item can be used on all crankings and angled hinges

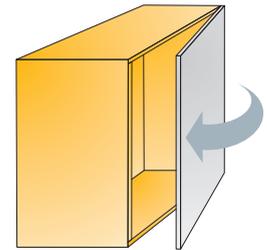

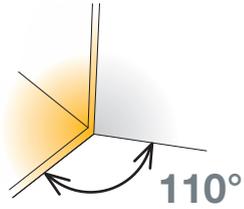

### 'Titus Damper Inside'

- Titus proprietary multi-purpose damping technology
- Reliable and consistent damping

## Add-on Damper for Sliding door

For bottom running sliding door systems

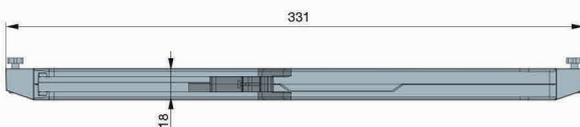

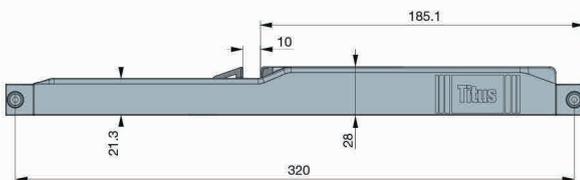

Titusoft SD100s

### Technical details

#### Released position

#### Loaded position

Drawings show example with components presented above

Item number

973-9060 →

Grey

380

The system consists of the following components

Quantity for 2 door cabinet

Standard component

Titusoft SD100s mechanism

2 pcs

Customized components to suit the customer's sliding door system

Attachment base

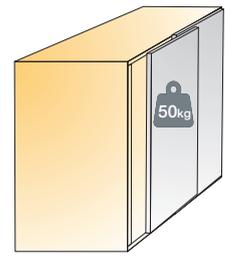

4 pcs

Activator and attachments are custom made components  
→ must be designed to suit customer's system

- Non-handed design
- Effortless door opening with low pull-out force
- Efficient damping on different door sizes
- Slim design for concealed application

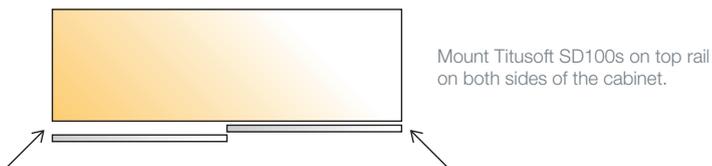

Titusoft SD100s capacity

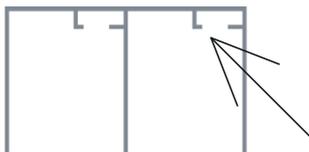

Up to 50kg per door

### Mounting details

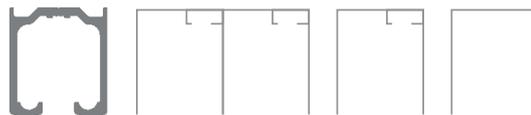

#### Non-handed design

#### Mounting position

Titusoft SD100s is mounted into the top profile

Fit various U and double U shaped profiles

#### Space requirements

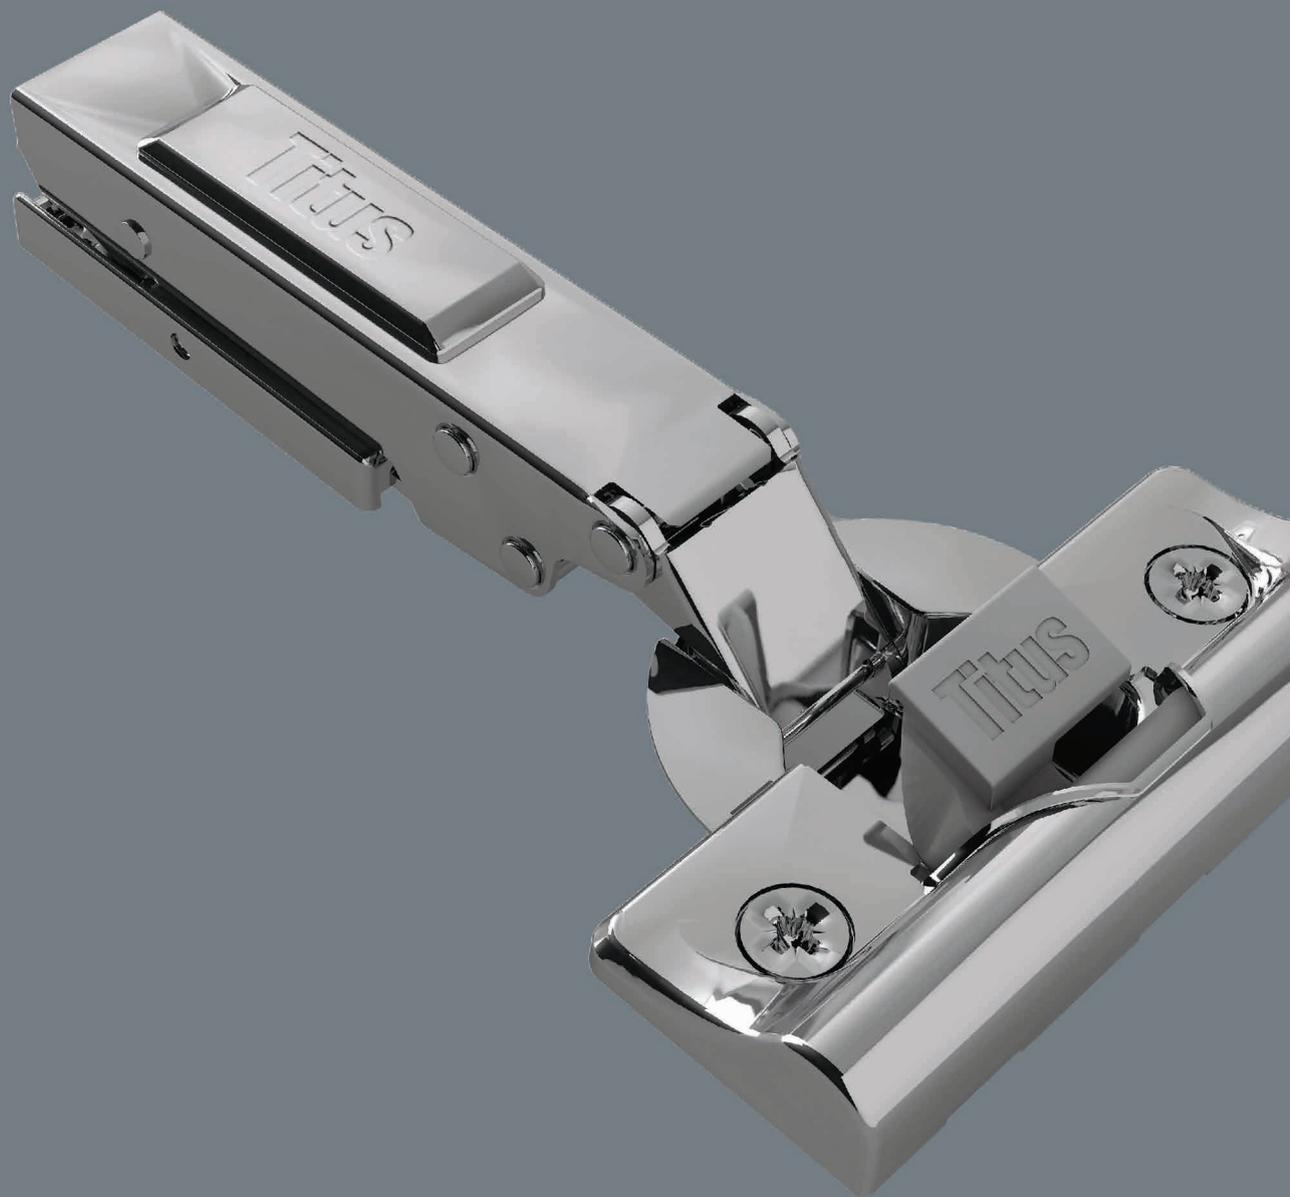

Slim design with 30mm height allows for concealed application

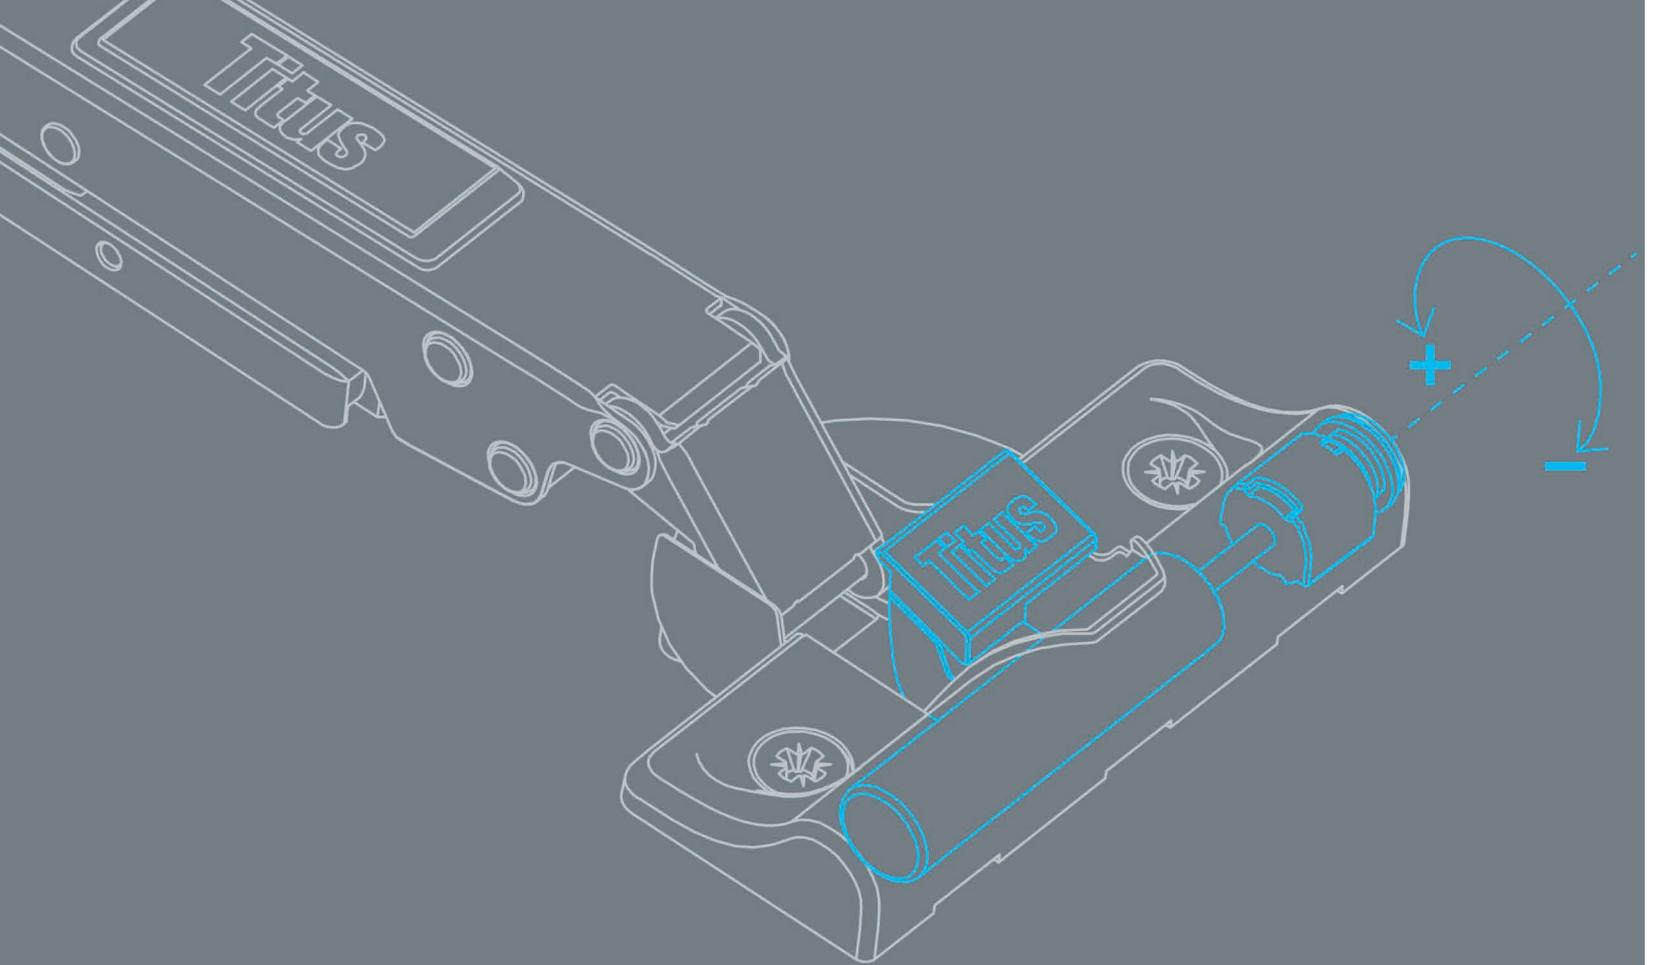

For further information please contact your Titus Group representative.

# Concealed Hinges

# Titus Hinges

## ConfidentClose

The hinge is designed to provide consumer preferred way of soft closing action.

- Fast closing
- Late start of deceleration action
- Quiet landing with SoftTouch

Based on independent consumer researches.

## One-for-All

- Damping on the hinge cup
- Damper, positioned transversal to the hinge cup allows for easy introduction of various hinge versions
- Damped and non-damped version on one mounting plate platform

## Adjustable Damping

Flexibility to tune performance to wide range of applications

- Consistent performance over a wide range of doors of different sizes and weights
- Easy accessible button for intuitive and quick adjustment

## Titus Damper Inside

- Efficient damping at any closing speed
- Reliable closing
- Damping force consistency

# A Comprehensive Range

## T-type hinge

**Titus New Generation hinge for quick furniture assembly and consistent performance on wide range of doors**

- 3Way snap-on mounting
- Highly tolerant
- Adjustable damping
- Low hinge cup depth

## S-type hinge

**Simple and quick snap-on mounting system**

- Easy assembly and disassembly
- Adjustable damping
- ConfidentClose
- Push to open for handleless furniture

## B-type hinge

**Reliable slide-on mounting system**

- Simplicity in use
- Adjustable damping
- ConfidentClose
- Reliable door closing

# Concealed Hinges

## Door Overlay

### How to Achieve the Desired Door Overlay?

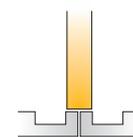

#### By choosing the hinge of appropriate cranking

Concealed hinges with specific hinge arms are available for different door overlays. The most common overlays are:

■ Cabinet side  
■ Door

- 1. Full overlay**  
Use a hinge with 0mm cranking

- 2. Partial overlay for double doors**  
Use a hinge with 5mm or 9mm cranking

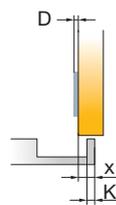

- 3. Inset door**  
Use a hinge with 15mm or 17mm cranking

#### By choosing the mounting plates of appropriate thickness

To achieve the desired overlay (x) while using a determined drilling distance (K), a mounting plate of appropriate

thickness (D) must be chosen from the enclosed table or calculated with given formula.

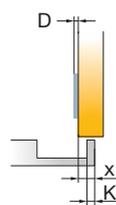

x	4	5	6	7	8	9
3	3	2	1	0		
K 4		3	2	1	0	
5			3	2	1	0

$$D = 4 + K - x$$

#### By choosing the appropriate drilling distance K

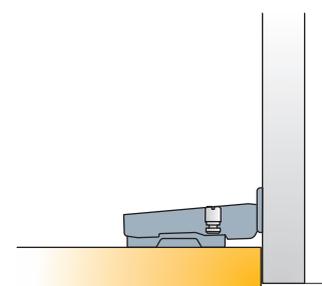

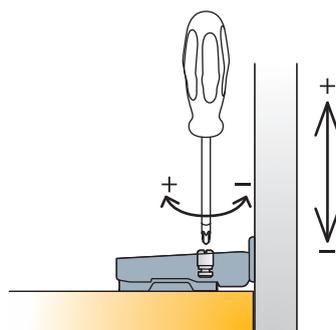

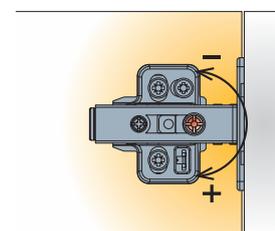

To achieve the desired door overlay (x) while using a determined mounting plate thickness (D), an appropriate drilling distance K must be chosen.

x	4	5	6	7	8	9
0				3	4	5
1			3	4	5	
D 2				5		
3	3	4	5			

### Through side adjustment

The side adjustment is made by rotating the appropriate screw on the hinge arm.

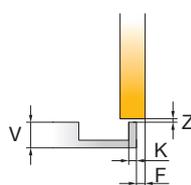

Adjustment range

### Door clearance and gap

The door clearance ( $F \geq F_{min}$ ) and gap ( $Z$ ) represent the minimal necessary space needed for the correct opening and closing of the door. The minimal required values depend on the cup drilling distance ( $K$ ), door thickness ( $V$ )

and the type of hinge. The minimum clearance scale can be found on product pages → see Door clearance chart. When using hinges with partial overlay the door clearance must be twice as large ( $F \geq 2F_{min}$ ).

V	16	17	18	19	20	21	22
3	0.3	0.5	0.7	1.0	1.3	1.7	2.5
K 4	0.3	0.5	0.7	0.9	1.2	1.6	2.1
5	0.3	0.5	0.7	0.9	1.2	1.5	2.0

Gap  $Z_{min}=0$

# Concealed Hinges

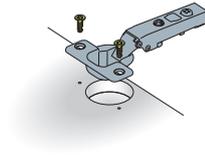

## Hinge Cup Types

### How to Mount the Hinge on the Door?

There are cup type symbols listed on product pages beside item numbers. Below you can find their explanation.

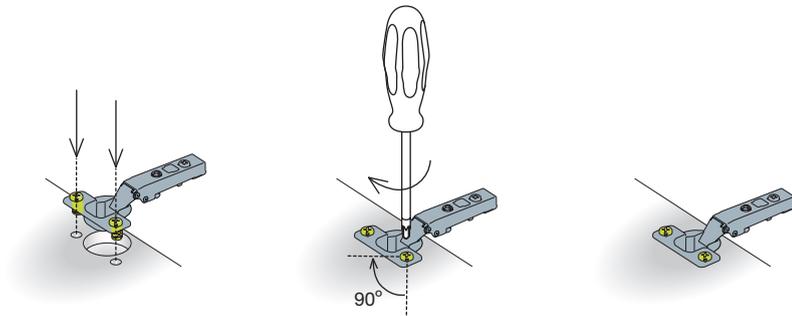

#### No pre-mounting

The hinge is fixed on the door with two screws. 3mm pilot holes recommended.

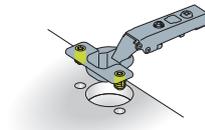

#### Easy-Fix time saving system

Quarter turn fixing for 8mm holes (interaxis 45/9.5) or 10mm holes (interaxis 48/6 and 52/5.5).

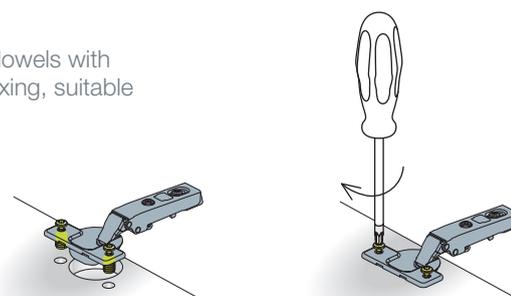

#### Machine insertion ready hinge cup

Premounted dowels suitable for machine insertion into 8mm holes (interaxis 45/9.5) or 10mm holes (interaxis 48/6 and 52/5.5)

#### Pre-mounted expando dowels

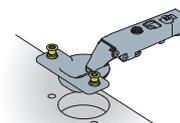

Pre-mounted expanding dowels with triple-start screw for fast fixing, suitable for 8mm holes.

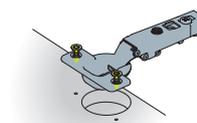

**Hinge cup with pre-mounted euro screws**

Pre-mounted euro screws for 5mm holes. Where not specified otherwise, euro screws are 13mm long.

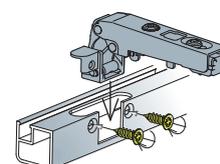

**Hinge cup with pre-mounted Ø4.5mm screws**

Pre-mounted chipboard screws. 3mm pilot holes recommended.

**Aluminium frame screw-on hinge cup**

The hinge is fixed onto a specific drilling on the aluminium frame.

# Concealed Hinges

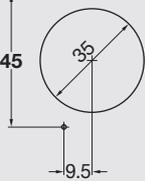

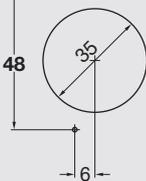

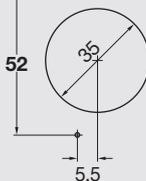

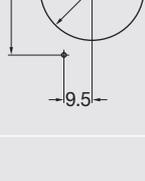

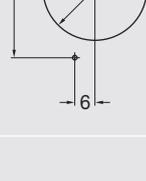

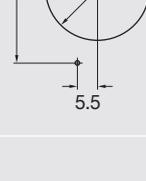

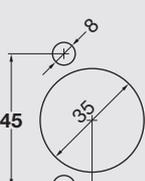

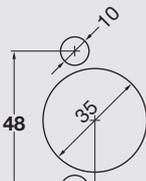

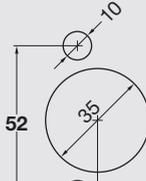

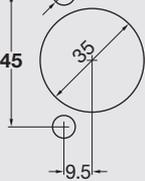

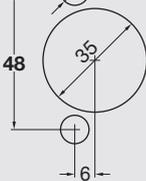

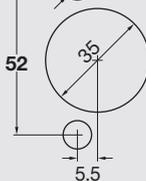

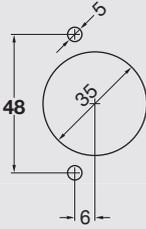

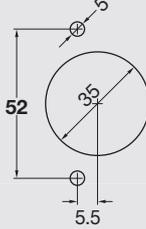

## Boring Details

### Drilling Patterns for Hinge Cup

#### Interaxis 45mm, 48mm and 52mm\*

- T-type
- S-type
- B-type

\*Available on special request → see page 0.3

	Interaxis 45mm	Interaxis 48mm	Interaxis 52mm
<b>Hinge cup type</b>	<b>Drilling pattern</b>	<b>Drilling pattern</b>	<b>Drilling pattern</b>
 Screw-on ready			
 Premounted Ø4.5mm screws			
 Machine insertion ready			
 Premounted expando dowels			
 Easy-fix system			
 Premounted euro screws			

Interaxis is the distance between two holes for fixing screws on the hinge cup.

# Concealed Hinges

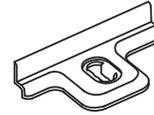

## Mounting Plate Type

### How to Fix the Mounting Plate on the Cabinet Side?

There are mounting plate type symbols listed on product pages beside item numbers. Below you can find their explanation.

 **No pre-mounting, chipboard screw ready**

The mounting plate is fixed with two chipboard screws or equivalent. 3mm pilot holes recommended.

 **No pre-mounting, euro screw ready**

Fixing with 6.3mm euro screws into pre-drilled 5mm holes. To choose appropriate head and length for use with this mounting plate is recommended.

 **Machine insertion ready**

Pre-mounted dowels for machine insertion into 10mm holes.

 **Pre-mounted euro screws**

Euro screws for 5mm holes are pre-mounted on the mounting plate. Available lengths: 11mm, 13mm and 15mm

 **Pre-mounted expanding dowels**

Pre-mounted expanding dowels for 5mm holes. Available lengths: 7.5mm and 10.5mm

 **Pre-mounted Ø4.5mm screws**

The mounting plate is fixed with two pre-mounted chipboard screws. 3mm pilot holes recommended.

# Concealed Hinges

## Hinge-to-plate Mounting

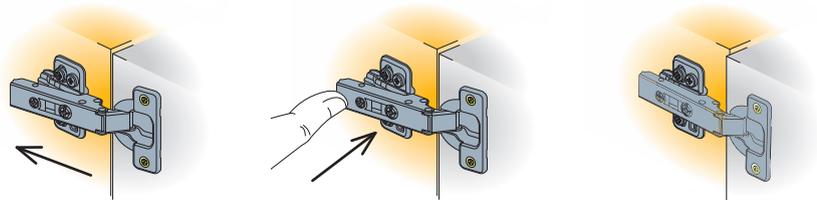

### How to Assemble the Hinge and the Mounting Plate?

#### T-type 3Way snap-on

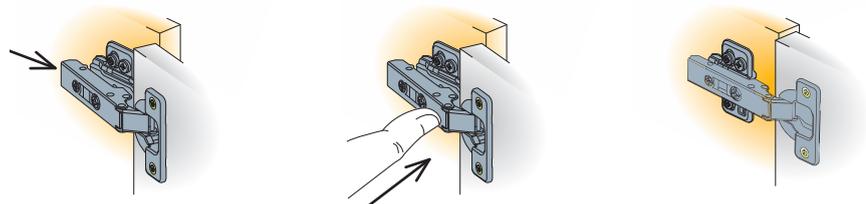

3Way snap-on mounting for intuitive hinge-to-plate assembly in three directions:

- from the hinge arm front
- from the hinge arm rear
- from the top

front assembly

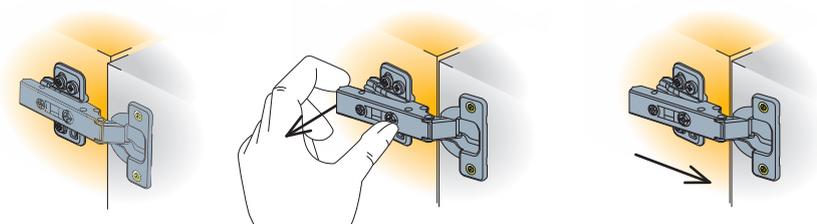

rear assembly

top assembly

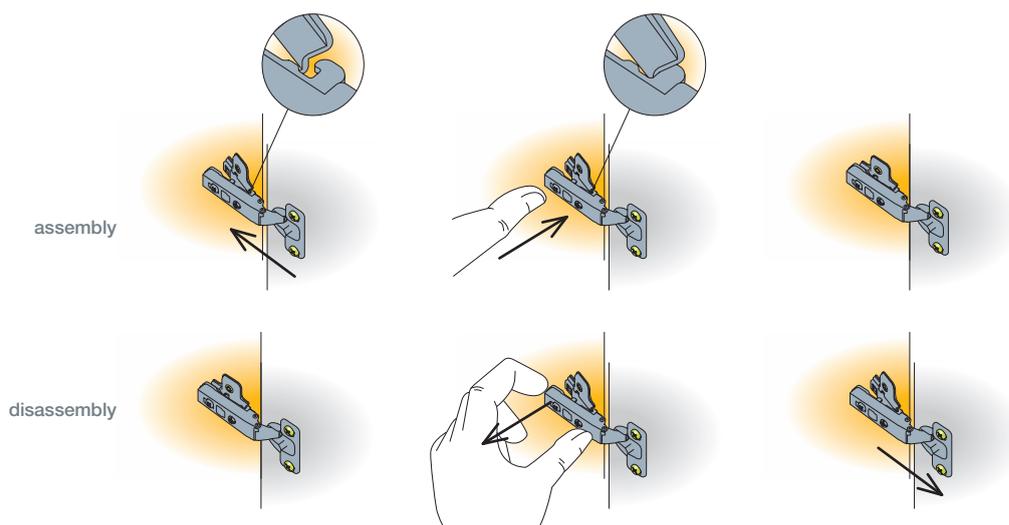

disassembly:  
for disassembly press rear  
button on the hinge arm.

### S-type snap-on

The door is assembled on the cabinet side simply by positioning the two hooks under the hinge arm on the outer part of the mounting plate and pressing gently on the rear part of the hinge arm.

For disassembly press the rear button on the hinge arm.

### B-type slide-on

The hinge is assembled by sliding the hinge arm over the mounting plate. The hinge adjustment screw must fit into the groove on the mounting plate.

After adjusting the door depth, the mounting procedure is finished by tightening the fixing screw.

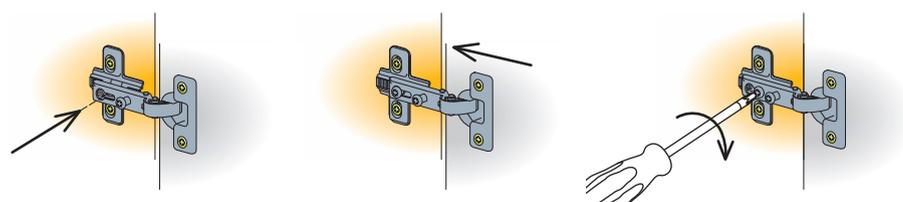

### Key-hole

- Wide angle hinge
- Refrigerator cabinet door hinge

The hinge is assembled on the mounting plate by inserting the fixing screw on the appropriate hole on the hinge arm.

After adjusting the door depth, the mounting procedure is finished by tightening the fixing screw.

# Concealed Hinges

## Loadings

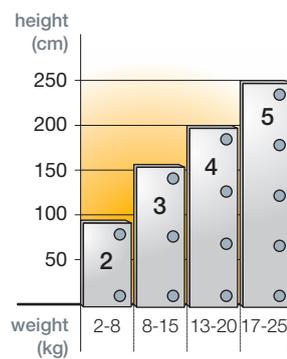

Use the appropriate number of hinges so that the door height or weight does not exceed that shown below.

### How Many Hinges per Door?

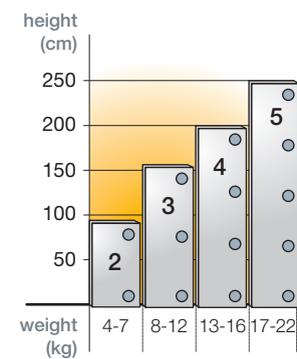

Check the enclosed specifications for the number of required hinges per door by considering door height and weight.

#### Concealed hinges with Ø 35mm hinge cup diameter

Standard hinges

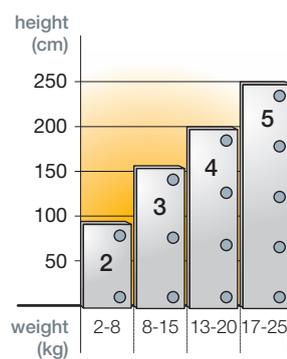

T-type

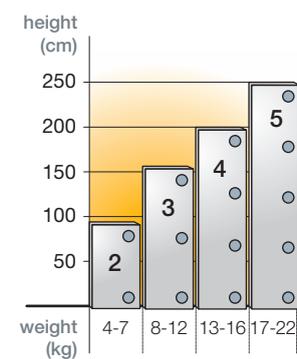

S-type  
B-type

Hinges with integrated damping

T-type Glissando

S-type-i  
B-type-i

Hinges with integrated damping can be combined with non-damped hinges from standard hinge range. A trial mounting is always recommended.

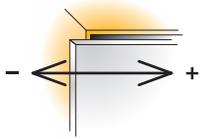

# Concealed Hinges

## Adjustment

Adjustment range can be found on the product pages.

### Side Adjustment

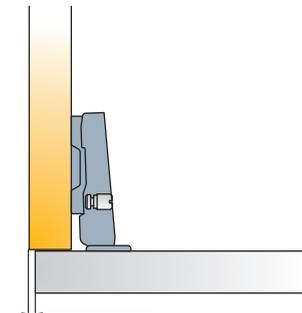

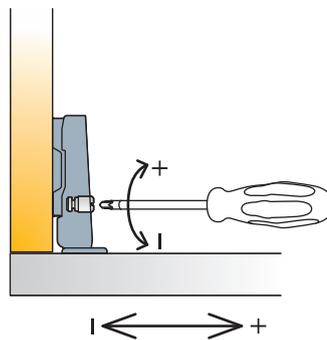

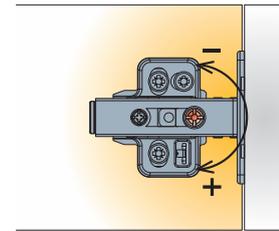

The side adjustment aligns the door with the side of the cabinet.

#### By rotating the adjustment screw

T-type  
S-type  
B-type

The side adjustment is made by rotating the screw on the hinge arm.

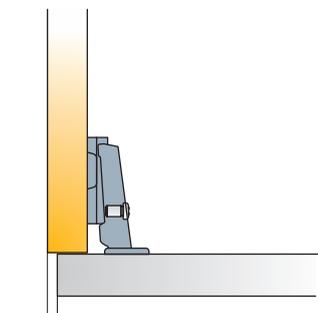

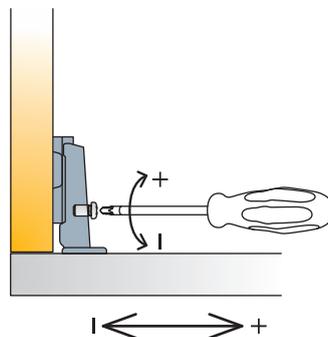

Adjustment range

#### By temporarily loosening the fixing screw

- Wide angle hinge 270°
- Refrigerator cabinet hinge

For the side adjustment:

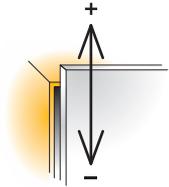

1. Release the fixing screw
  2. Make the necessary adjustment by rotating the appropriate screw
  3. Tighten the fixing screw
- Without releasing the fixing screw no side adjustment is possible.

Adjustment range

# Concealed Hinges Adjustment

## Height Adjustment

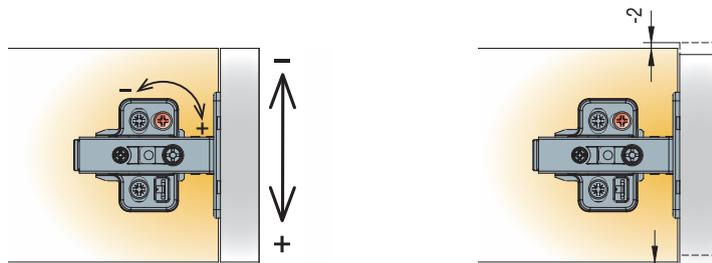

Height adjustment is necessary to achieve optimal vertical door position.

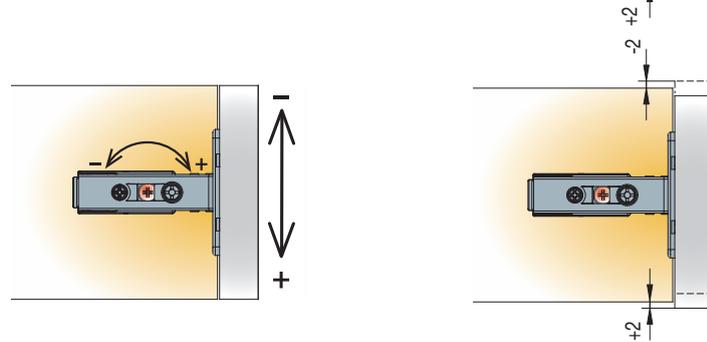

### By rotating the cam adjuster

The height adjustment is made by rotating the cam adjuster on the mounting plate.

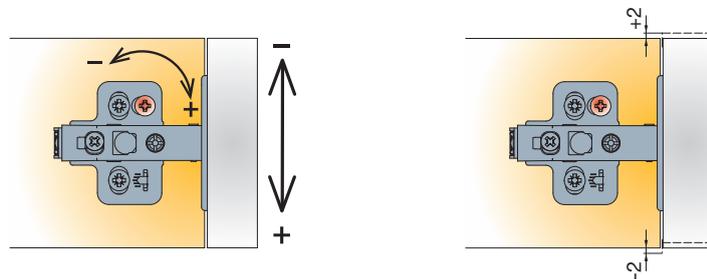

T-type with cam adjustable cruciform mounting plate

T-type with cam adjustable horizontal mounting plate

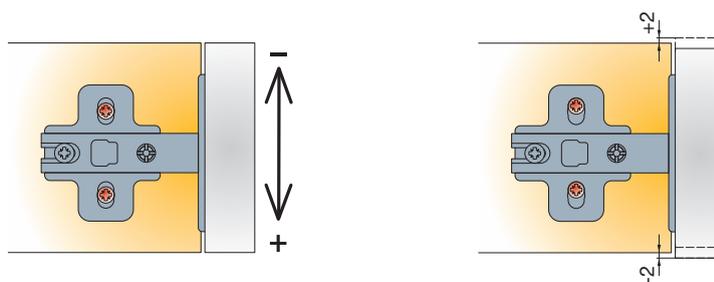

S-type with cam adjustable cruciform mounting plate

**By releasing the screw slot**

- T-type and S-type with cruciform mounting plate
- B-type
- Wide angle hinge

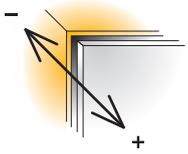

For height adjustment the two mounting plate fixing screws have to be temporarily released while making the manual adjustment.

# Concealed Hinges

## Adjustment

### Depth Adjustment

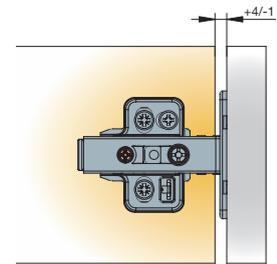

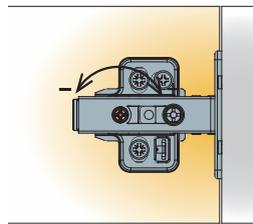

The system enables easy adjustment of the gap between door and cabinet.

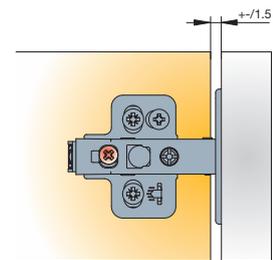

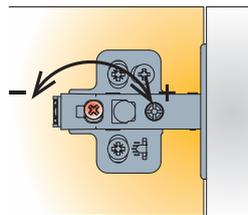

#### By rotating the cam adjuster

Rotate the cam adjuster on the hinge arm.

- T-type

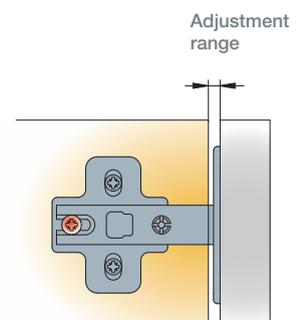

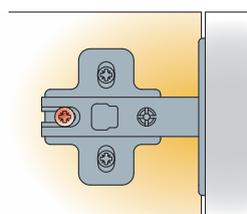

- S-type plus

#### By releasing the fixing or adjustment screw

- S-type
- B-type

The depth adjustment is made by temporarily releasing the adjustment screw (S-type) or fixing screw (B-type, Hinge Ø40). After the adjustment is made the screw has to be re-tightened.

## Door Closing Type

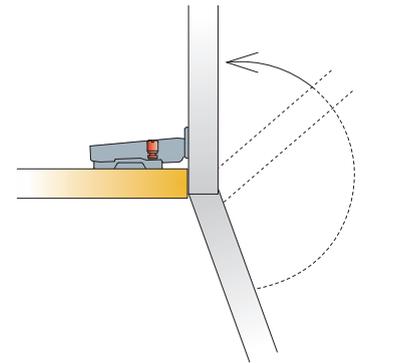

There are two door closing systems:

self - closing ←  
free - swinging -----

### Concealed hinges with self-closing angle

- T-type
- S-type
- B-type

The self-closing angle is the point from which the door will close by itself, without user assistance. The mechanism starts closing the door from a 14° to 25° angle, depending on the concealed hinge type. From that point to the maximum opening angle the door remains in an open position.

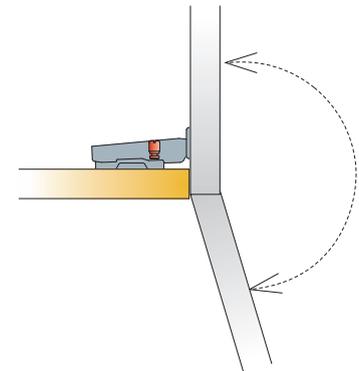

### Free-swinging door hinges\*

- all series

Optionally most of Titus concealed hinges can be supplied without self-closing mechanism. These hinges may be ordered upon request. Soft closing devices can not be used with free-swinging door hinges.

\* Available upon special request → see page 3.9

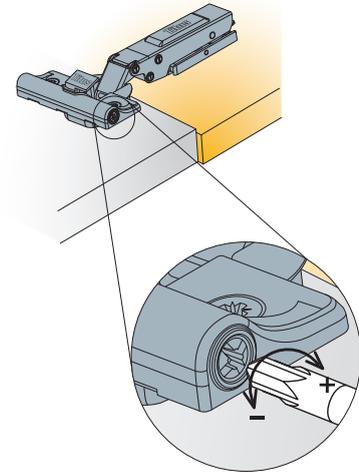

# Concealed Hinges Adjustment

## Damping Adjustment

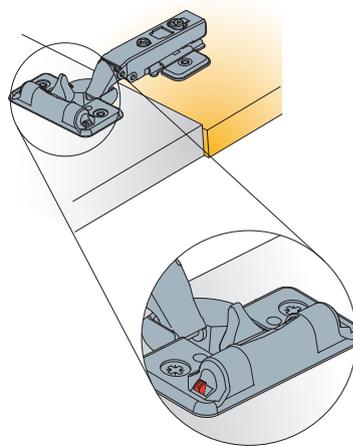

### T-type Glissando

The damping action can be adjusted to fit different door weights and sizes which enables perfect door functioning.

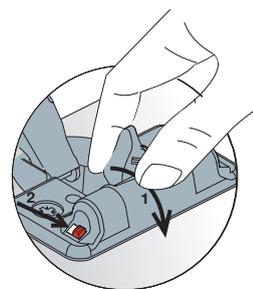

Damping is factory pre-set to the medium damping value. Turn towards '+' to increase and '-' to decrease the damping.

### S-type-i plus series S-type-i series B-type-i series

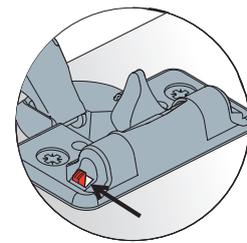

The damping reduction switch in a pre-set position.

To decrease or to increase the damping, change the position of the damping reduction switch. Hinges are factory pre-set to the maximum damping value.

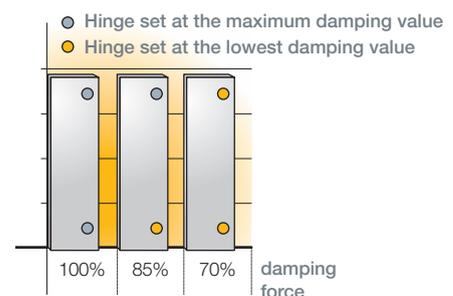

To decrease the damping  
1. Lift the damping activator.  
2. Slide the damping reduction switch to opposite position.

To increase the damping, slide the damping reduction switch back to the factory pre-set position.

### Damping force change

The damping reduction switch adjusts the damping. Example shows the damping change in case of two hinges on door.

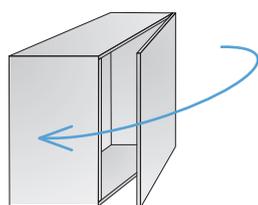

## Key Design Choices

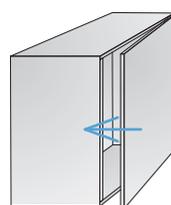

### 'ConfidentClose'

The hinge is designed to provide consumer preferred way of soft closing action.

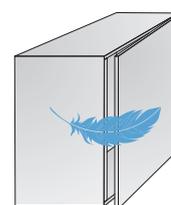

*Based on results of Titus researches made in UK, Germany and Slovenia*

Fast closing

Late start of deceleration action

Quiet landing with 'SoftTouch'

### 'One-for-all' efficiency principle

Damping on the hinge cup  
Damper, positioned transversal to the hinge cup allows for easy introduction of various hinge versions

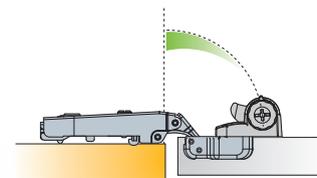

Damped and non-damped version on one mounting plate platform

### Adjustable damping

Flexibility to tune performance for all applications

- Consistent performance over a wide range of doors of different sizes and weights
- Easy accessible adjustment button for intuitive and quick adjustment

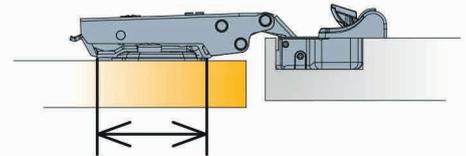

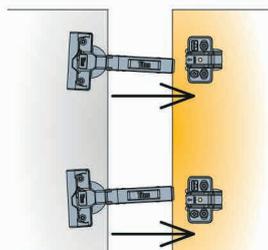

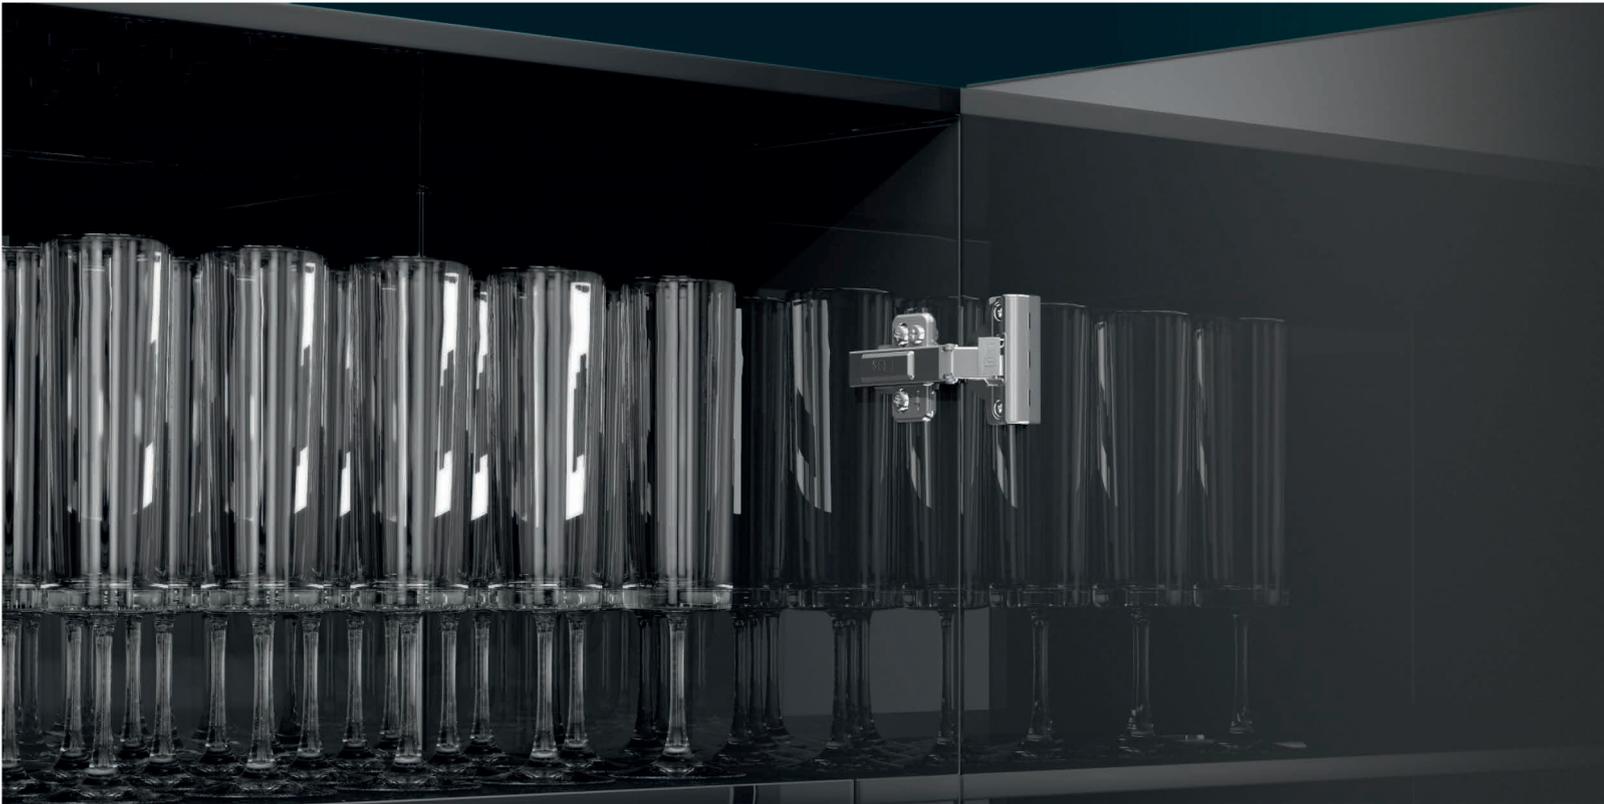

Adjustable damping zone and force

### Titus Damper Inside

- Efficient damping at any closing speed
- Reliable closing
- Damping force consistency

# T-type Hinges

## Easy door installation even in cases of 4-5 hinges per door

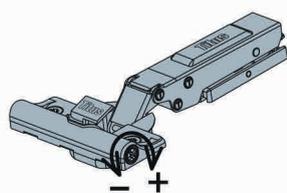

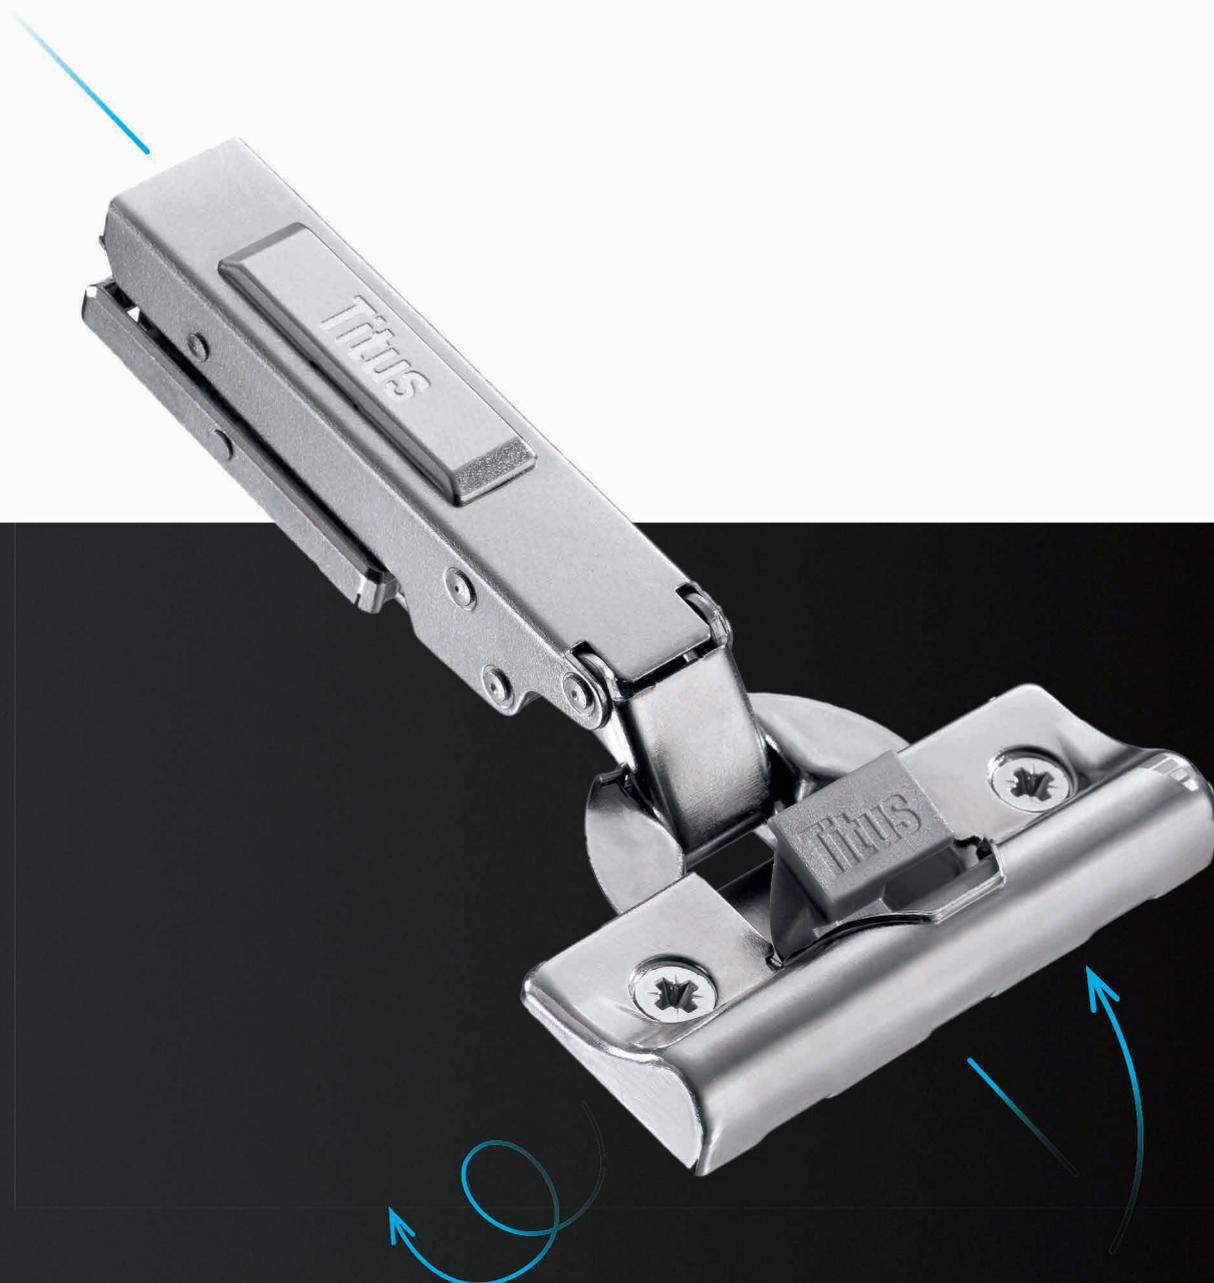

- Easy and quick assembly and disassembly
- Flexibility for the furniture user
- Tight hinge-to-plate joint improves hinge stability and reduces door sag

## Highly tolerant

- Efficient performance in marginal values of tolerances
- Reliable door closing in case of accidental misalignment
- ConfidentClose assured

## Rigidity

- Hinge-to-plate attachment assures stability and rigidity
- Smooth performance

### Adjustable damping

- Consistent performance on doors of different dimensions and weights
- Intuitive adjustment procedure

### 'Titus Damper Inside'

- Titus proprietary multi-purpose damping technology
- Reliable and consistent life-long damping

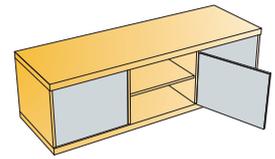

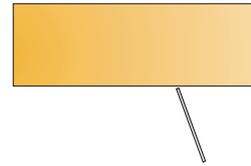

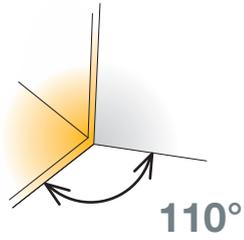

### Proven Glissando concept

- Damper is positioned transversal on the hinge cup
- Reliable performance

# S-type Hinges

## 'Sistema di montaggio 'Snap-on'

- Easy and quick assembly and disassembly
- Flexibility for the furniture user
- Tight hinge-to-plate joint improves hinge stability and reduces door sag

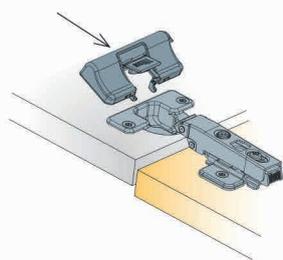

## Regolazione dell'altezza tramite eccentrico facilmente accessibile

- Regolazione dell'altezza intuitiva e rapida
- Facile da usare

## 'ConfidentClose'

- 1 Chiusura veloce
- 2 Innesco ritardato dell'azione di decelerazione
- 3 Arresto silenzioso grazie a "SoftTouch"

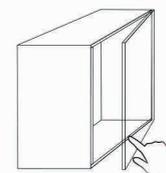

### Opzioni di chiusura ammortizzata:

- Integrato nella cerniera
- Aggiuntivo con tazza della cerniera pronta per Glissando
- Stand-alone

### Smorzamento impostabile

- Lo smorzamento regolabile assicura il perfetto funzionamento su ogni anta

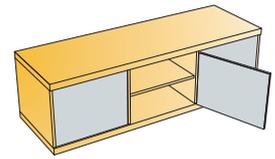

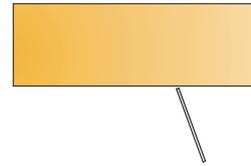

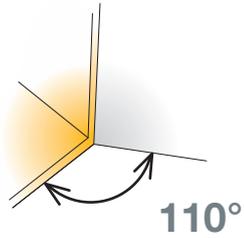

### Apertura a pressione

- Garantisce un'apertura senza sforzo
- Design elegante dell'armadietto
- Ante senza maniglie

# B-type Hinges

## Slide-on mounting system

- Proven and reliable hinge-to-plate mounting solution
- Cost effectiveness

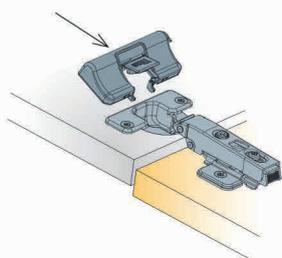

## Designed for a wide use

- Solution for different applications and materials
- Proven solution for RTA furniture, household application and tall cabinets

## ConfidentClose

- 1 Fast closing
- 2 Late start of deceleration action
- 3 Quiet landing with SoftTouch

### Soft closing options

- Hinge integrated
- Add-on with Glissando ready hinge cup
- Stand-alone
- Rigid slide-on hinge design enables optimal performance when used with soft closer

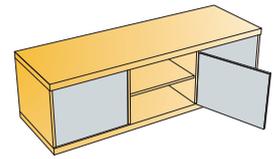

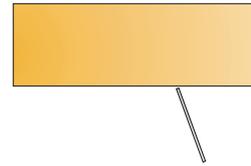

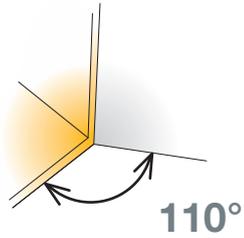

### Adjustable damping

- Adjustable damping assures perfect functioning on every door

# Adjustable Cabinet Leg Range

## Plinth Clips and Fox Clip

- Spring design eliminates the need for drilling and fits into any position on plinth
- The screw in version can sit in variable plinth positions
- When taking plinth around the corner, the fitting is reversible.

# The Titus Group Profile

# Titus Group

Titus focuses on the design, manufacture and distribution of connectors, concealed hinges drawers and soft closing mechanisms in furniture and household appliances.

Titus Group is owned and managed from its headquarters in United Kingdom. We are able to provide products and services to every customer around the world based on manufacturing facilities in Europe, North America, China, SE Asia, Australia and New Zealand.

**Quickfit technology makes Titus the World leader in connectors for RTA furniture**

## Vision

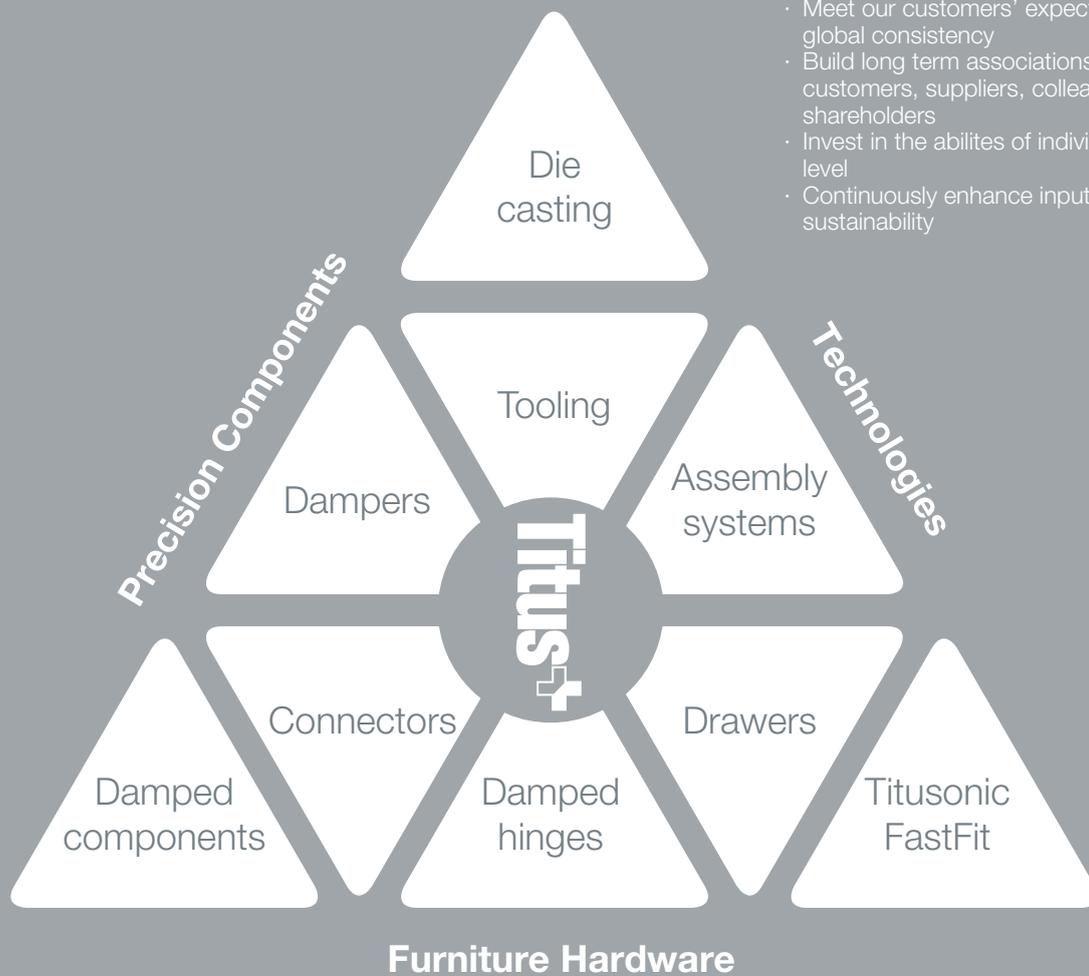

The world's best engineering for precision components

## Mission

To provide manufacturers with components' solutions that improve competitiveness

## Titus Business Philosophies and Principles

- Gain total knowledge of our customers and their markets
- Focus on identifying and creating high volume component niches
- Meet our customers' expectations with global consistency
- Build long term associations with customers, suppliers, colleagues and shareholders
- Invest in the abilities of individuals at every level
- Continuously enhance input efficiency and sustainability

## Furniture Hardware

- Cabinet connectors
- Concealed hinges
- Soft closing systems
- Drawers and drawer systems
- Kitchen accessories
- Furniture locks
- Decorative

## Components

- Dampers
- Precision components

## Technologies

- Automation systems
- Precision castings
- Die cast technologies
- Tooling
- Ultrasound fastening technology
- FastFit technology

# 'Totally Integrated Engineering'

## Product Design

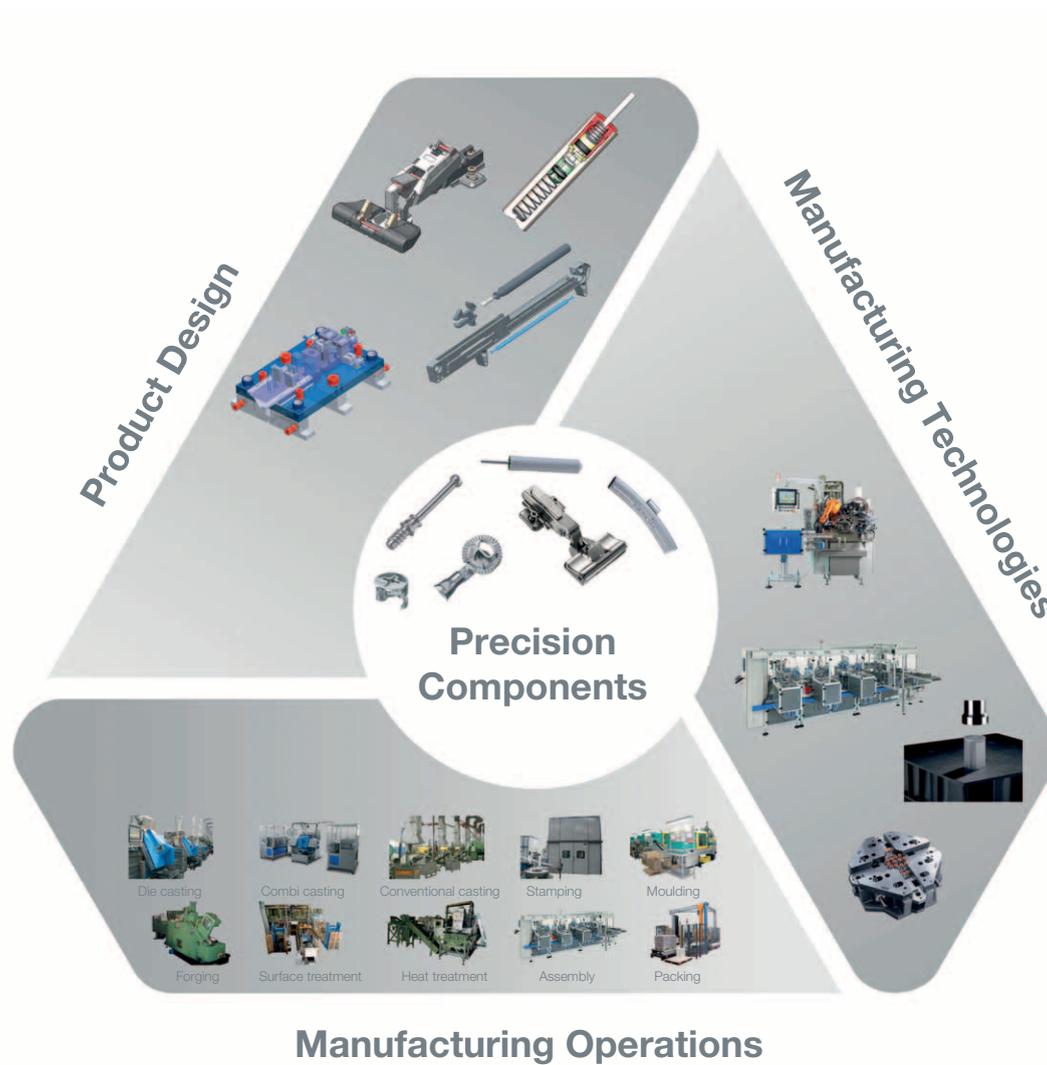

Design and engineering of unique components  
Consistent and repeatable product quality

## Manufacturing Technologies

to improve productivity and product quality

## Manufacturing Operations

A wide array of technologies and services required for high volume production of precision components available in-house

## Fittings for purpose

Unique product advantages for better value for money and lower 'total installed cost'

## Innovations that improve

with less parts, less different parts, less preparation actions, faster assembly

## Fast time-to-market

# Quality

## Continuous Improvement

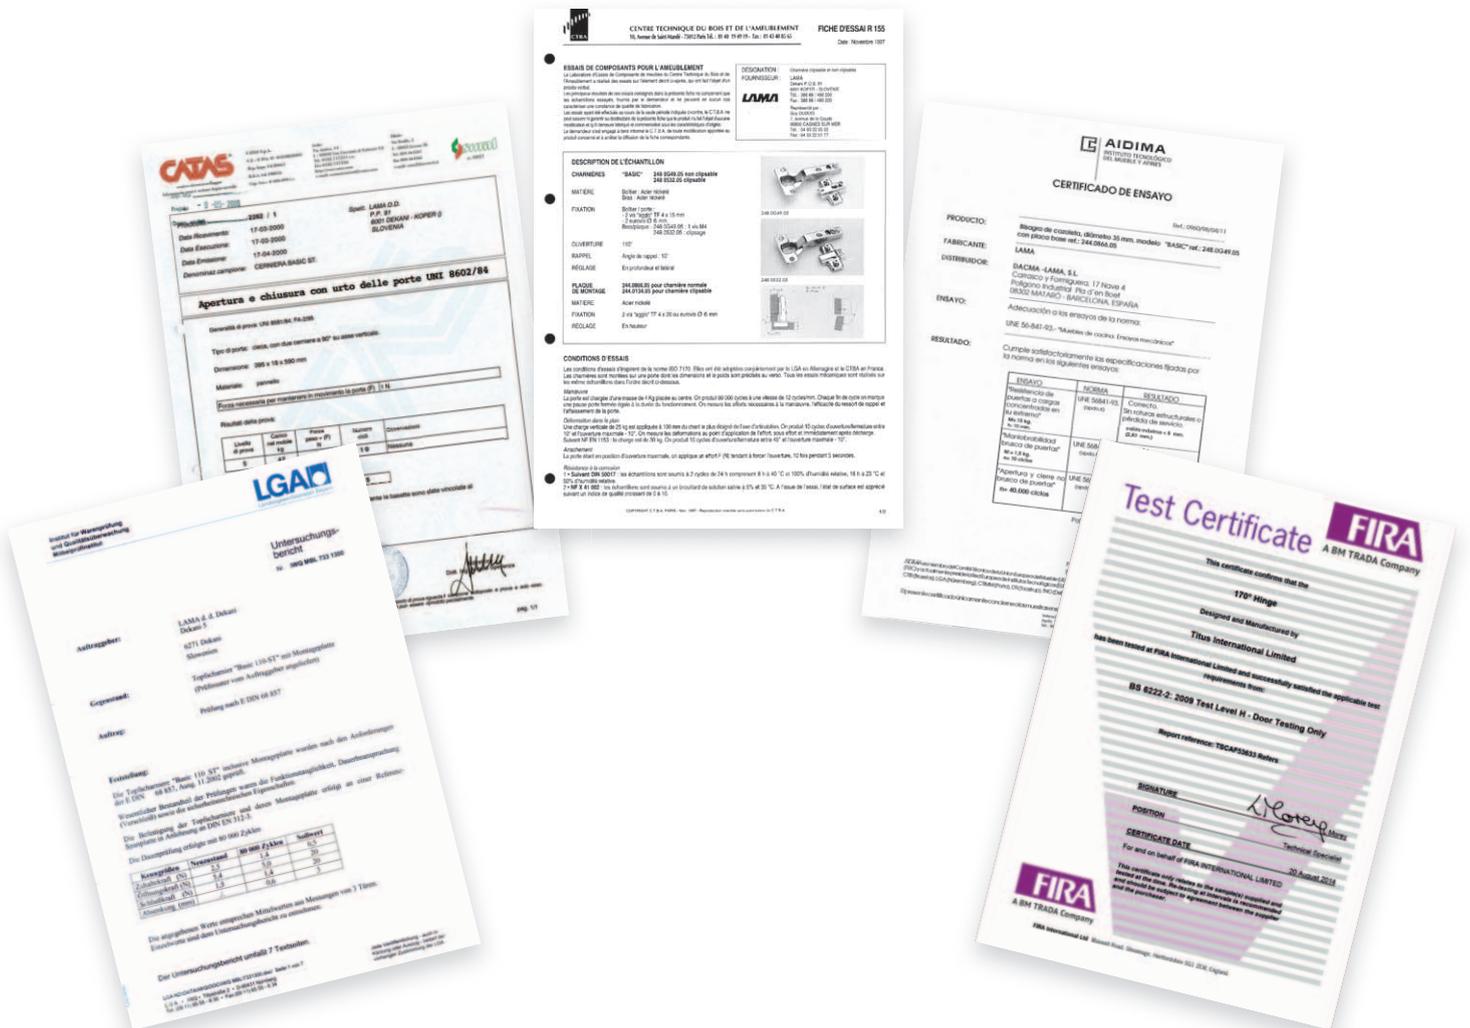

The Titus Group Mission, to improve the competitiveness of our customers, encourages us to continuously improve our products, services, processes and competencies of our employees.

## Quality

We believe that the Titus Mission is achieved most effectively through the management of our design, manufacturing and service activities in conformance with the ISO 9001 standard for quality management. Quality has a broad meaning for us: it is our guide to the selection of materials, work, processes, internal relations and cooperation with partners.

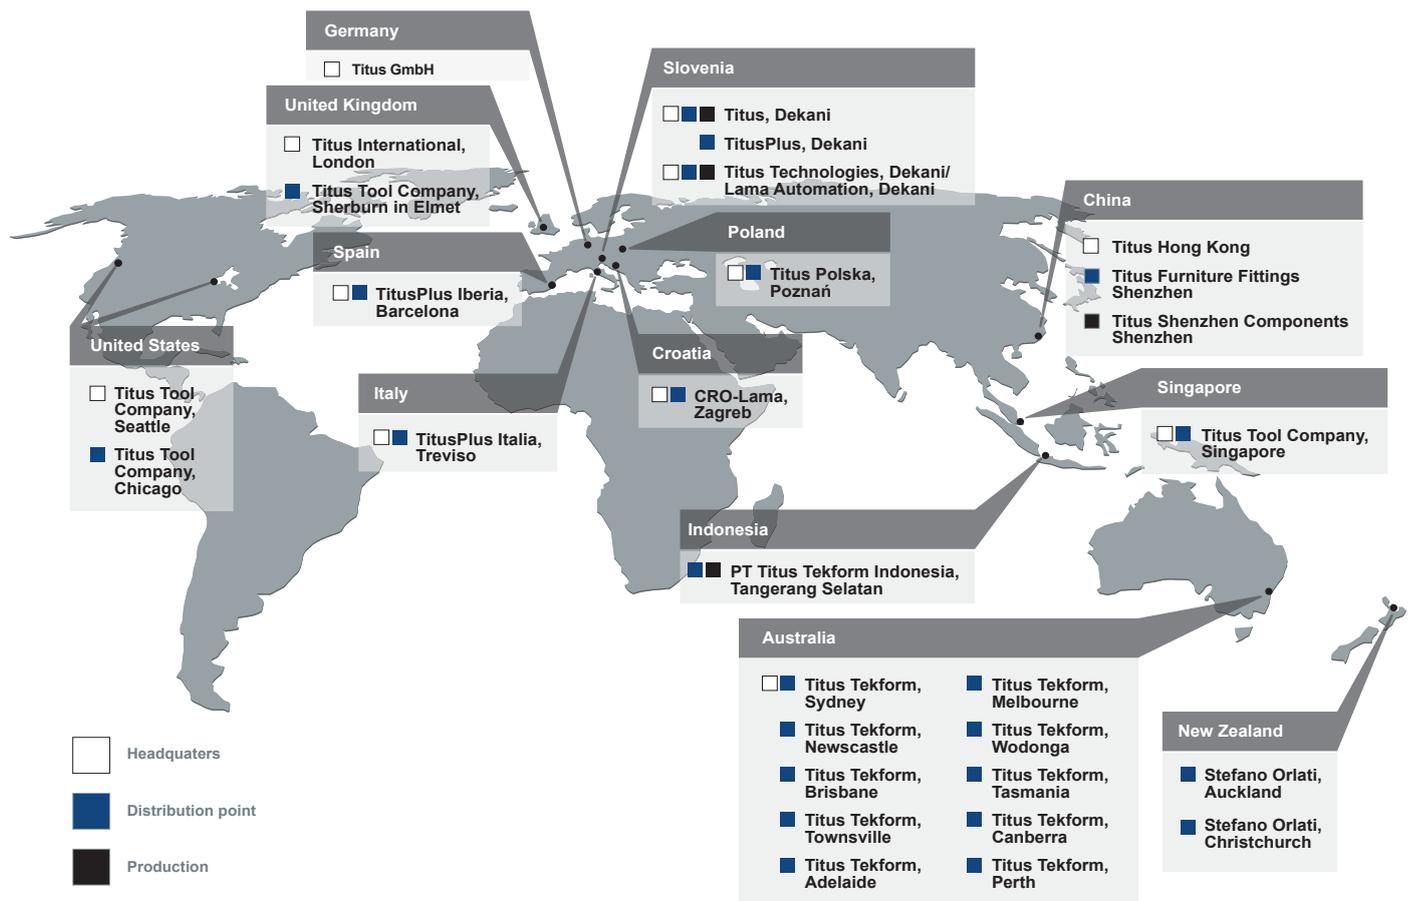

## Products

Our integrated quality system produces technically optimized products of high quality. They are assessed regularly in our own test labs as well as by internationally renowned institutions, such as LGA from Germany, CTBA from France, FIRA from United Kingdom, CATAS from Italy, AIDIMA from Spain, and others.

# Global player Worldwide design, manufacturing and distribution capabilities
